Word of the Week

Ubiquitous

Adjective; Existing or being everywhere at the same time; omniscient

Ex. Cellphones have become **ubiquitous** among today's teenagers.

Humans of MCEC

Mrs. Williams

Mrs. Williams teaches chemistry, research methods, and she's gem of a teacher. Ms. Williams has two daughters, and her teaching reflects her familial and moral values. What makes Mrs. Williams really special though is her knack for organization and her hilarious sense of humor. She is passionate about her subject, and keeps her students immersed in interesting and informative material.

#PhoenixPhenoms

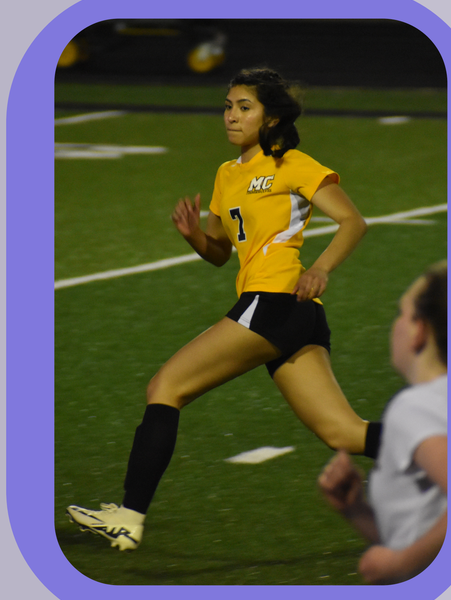

Women's Soccer

the MCHS girls' soccer team shows great teamwork, skill and dedication both on and off the field. their passion for the game is evident in their remarkable performances, inspiring both fans and teammates alike. Each match, they show not only athletic prowess, but resilience and sportsmanship, redefining the word 'champion' through their commitment.

Madagascar

As the king of the urban jungle, Alex the lion is the main attraction at the Central Park Zoo in New York. Alex isn't alone though, he has friends. Melman the giraffe, Marty the zebra, and Gloria the hippo are all friends of Alex's, and they've all lived in captivity since birth. Marty's curiosity gets the best of him, and he begins to wonder what it's like outside of the glass. With the help of a few elite penguins, the animals escape as they explore the world together.

Eclipse

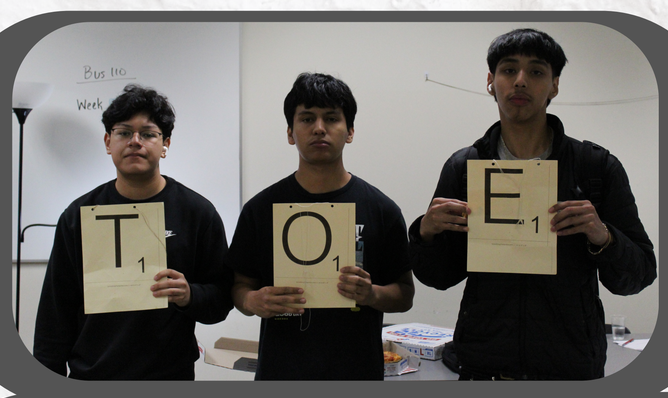

On April 8th, a total solar eclipse occurred inMexico, North America and Canada. When speaking about eclipses, totality is a state in which the moon completely covers the sun, and the world goes dark for minutes on end. Unfortunately, North Carolina did not experience totality (it was only about 84% here). However, students at MCEC were able to view the eclipse. If you look at the eclipse directly, you may suffer damage to your retina. Our students stayed safe with specially-made eclipse glasses, designed to protect their eyes. The next total solar eclipse will be viewable from earth in 2045, and it was truly a wonder to experience such a rare phenomenon.

Scrabble

Every year, MCEC hosts a Scrabble Day, where students and teachers choose large letters. These letters are used to create words, inspired by the board game Scrabble. The words are judged from various categories including: Longest Word School Spirit and ACT Awesomeness. Scrabble Day is always a big hit, and encourages cooperation among students, cohorts, and grade levels.
