No

Sound process being made!

Something needs to be done for this school system quickly!! The kids are the number one focus and support for the teachers. These kids need to be college ready and many are not. We cannot throw a party and be proud of a C score !!! Unacceptable!!! The kids are better and smarter than this.

Covid did have an impact because everyone was out sick . And catching up is very hard to do at times.

I don't know

It's not so much as the funding itself but the person who is being funded not at top notch performance.

Math Reading and other

There is a need for More teacher support and classroom aids

The school system need to update security and all schools. The security is horrible.

You need a librarian at the high, the students need and deserve it

Many of the problems start at home with the parents and their children. I feel that unfortunately until parents realize they are at fault for the actions of their child(ren) when the child is out of their presence there won't be a change. Teachers can't do it alone.

Parents ask that teachers don't talk to their child when they get in trouble. Then ask that the principal not talk to the child. Now the next best options is alternative school or suspension, but the parent feels this is too extreme. If those that are in charge can't do their job because of the parents then that causes the problem that we see each day.

I don't feel the school system has done a good job in providing tenure teachers for the students especially in the middle school. Some classes have not had a full time in their classrooms last year or this year.
