

Evaluation of the Reset Centers: One-Page Summary

Margaret Mastrogiovanni, Ph.D., Kelli Weaver, M.S.

The **Reset Center initiative** was implemented in 2021-22 as an alternative to exclusionary discipline practices. Through a redesigned, restorative, and student-centered approach to discipline, the initiative offers a short-term educational and behavioral management service for students temporarily removed from the classroom setting. The goal of the initiative is to identify root causes of student behavior, address social-emotional needs, and provide academic support. All 54 Reset Centers campuses have designated rooms to facilitate services.

"Reset Center allows students to learn from their behavior by reflecting on what led them to the behavior and creating coping mechanisms to prevent future outbursts."

- Campus Administrator

"[Reset Center] Initiative allow us to utilize tools that help the whole person and allow students to rethink their ideas and make necessary changes in order to be successful in school. Being able to communicate is key to success."

- Reset Center Coordinator
