

Dear Parents and Guardians,

I am pleased to announce that we will be continuing TeleHealth services for our students for the 2024-2025 school year. TeleHealth services will be provided by Misty Barker, NP-C and Main Street Family Care. TeleHealth services will help to serve our students and faculty members with their healthcare needs.

So, what is TeleHealth? When your child is sick, your child's school nurse will screen your child. The school nurse will notify the parent or guardian. If you decide that you want your child to use TeleHealth services, the school nurse will notify Main Street Family Care and will set up an appointment for TeleHealth services that day. Your child will be seated in front of our TeleHealth computer and will then be seen by one of the practitioners at Main Street Family Care. Your child's school nurse will be with your child during the entire visit. Once a plan of care has been established by the practitioners at Main Street Family Care, the school nurse will notify you. TeleHealth will be helpful when your child is sick.

We encourage you to keep your child at home if your child is sick. However, if your child becomes ill at school, and you are not able to get your child to a clinic to be seen, TeleHealth services will be beneficial in getting your child the care they need. If you would like to sign up your child for TeleHealth, please sign the TeleHealth consent form in your child's school registration packet. If you have any questions about TeleHealth, please contact your child's school nurse.

Thank you,

Crystal Prince, RN
