RE: INTEGRATED PEST MANAGEMENT PLAN

Orland School District 135 has implemented an Integrated Pest Management Plan in all 10 schools as required by 225 ILCS 235/10.2. The focus of the system is to identify and eliminate conditions in the school that could cause pests to be a problem. Applications of pest control materials are made only when necessary to eliminate a pest problem. Regular spraying inside the school building is not part of the pest program; however, occasional applications of pesticide control materials may be used to maintain the school grounds, when students and staff are not present.

If you would like to receive written notification prior to the application of pest control materials subject to the notification requirements, please contact the Buildings & Grounds Department at (708) 364-3345.
