

Section 504: FAQs

1. What is a physical or mental impairment that substantially limits a major life activity?

The determination of whether a student has a physical or mental impairment that substantially limits a major life activity must be made on the basis of an individual inquiry. The Section 504 regulatory provision at 34 C.F.R. 104.3(j)(2)(i) defines a physical or mental impairment as any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genito-urinary; hemic and lymphatic; skin; and endocrine; or any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities. The regulatory provision does not set forth an exhaustive list of specific diseases and conditions that may constitute physical or mental impairments because of the difficulty of ensuring the comprehensiveness of such a list.

Major life activities, as defined in the Section 504 regulations at 34 C.F.R. 104.3(j)(2)(ii), include functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working. This list is not exhaustive. Other functions can be major life activities for purposes of Section 504. In the Amendments Act (see FAQ 1), Congress provided additional examples of general activities that are major life activities, including eating, sleeping, standing, lifting, bending, reading, concentrating, thinking, and communicating. Congress also provided a non-exhaustive list of examples of "major bodily functions" that are major life activities, such as the functions of the immune system, normal cell growth, digestive, bowel, bladder, neurological, brain, respiratory, circulatory, endocrine, and reproductive functions. The Section 504 regulatory provision, though not as comprehensive as the Amendments Act, is still valid – the Section 504 regulatory provision's list of examples of major life activities is not exclusive, and an activity or function not specifically listed in the Section 504 regulatory provision can nonetheless be a major life activity.

2. Once a student is identified as eligible for services under Section 504, is that student always entitled to such services?

Yes, as long as the student remains eligible. The protections of Section 504 extend only to individuals who meet the regulatory definition of a person with a disability. If a recipient school district re-evaluates a student in accordance with the Section 504 regulatory provision at 34 C.F.R. 104.35 and determines that the student's mental or physical impairment no longer substantially limits his/her ability to learn or any other major life activity, the student is no longer eligible for services under Section 504.

3. Are there any impairments which automatically mean that a student has a disability under Section 504?

No. An impairment in and of itself is not a disability. The impairment must substantially limit one or more major life activities in order to be considered a disability under Section 504.

4. Can a medical diagnosis suffice as an evaluation for the purpose of providing FAPE?

No. A physician's medical diagnosis may be considered among other sources in evaluating a student with an impairment or believed to have an impairment which substantially limits a major life activity. Other sources to be considered, along with the medical diagnosis, include aptitude and achievement tests, teacher recommendations, physical condition, social and cultural background, and adaptive behavior. Section 504 regulations require school districts to draw upon a variety of sources in interpreting evaluation data and making placement decisions.
