Appendix

District Mission

The City of St. Charles School District will REACH, TEACH, and EMPOWER all students by providing a challenging, diverse, and innovative education.

District Vision

The City of St. Charles School District will be an educational leader recognized for high performance and academic excellence that prepares students to succeed in an ever-changing global society.

District Values

We, the City of St. Charles School District community of students, parents, staff, and patrons, value:

- High quality education for all students which includes:
 - Lifelong learning from early childhood through adult education
 - Rigorous learning experiences that challenge all students
 - Instruction that meets the needs of a diverse community
 - Respect for all
 - Real world, critical thinking and problem-solving skills to prepare students for the 21st Century
 - Developing caring, productive, and responsible citizens
 - Strong engagement of family and community
 - A safe, secure, and nurturing school environment

- Achievement through:
 - Celebration of individual success
 - Collaboration with parents and community stakeholders
 - Exploration, Innovation, and creativity

- High quality staff by:
 - Hiring and retaining highly qualified and invested employees
 - Providing professional development and collaboration focused on increasing student achievement
 - Empowering staff to use innovative resources and practices

- Informed decisions that are:
 - Student-centered
 - Focused on student achievement
 - Data Driven
 - Considerate of all points of view
 - Fiscally responsible

District Goals

For planning purposes, five overarching goals have been developed. These goals are statements of the key functions of the school district.

1. Student Performance
 - Develop and enhance the quality educational/instructional programs to improve student performance and enable students to meet their personal, academic, and career goals.
2. Highly qualified staff
 - Recruit, attract, develop, and retain highly qualified staff to carry out the District's mission, vision, goals, and objectives.
3. Facilities, Support, and Instructional Resource
 - Provide and maintain appropriate instructional resources, support services, and functional and safe facilities.
4. Parent and Community Involvement
 - Promote, facilitate and enhance parent, student, and community involvement in district educational programs.
5. Governance
 - Govern the district in an efficient and effective manner providing leadership and representation to benefit the students, staff, and patrons of the district.

School District Philosophical Foundations

Teachers in the School District of the City of St. Charles share in and ascribe to a philosophy that places children at the heart of the educational process. We feel that it is our professional responsibility to strive to be our best at all times and to maximize our efforts by ensuring that the following factors are present in our classrooms and our schools.

1. Learning is developed within the personal, physical, social, and intellectual contexts of the learner.
2. A strong educational program should provide developmental continuity.
3. The successful learner is motivated, strategic, knowledgeable, and interactive.
4. Children learn best when they have real purposes and can make connections to real life.
5. Effective learning is a combination of student exploration and teacher and mentor modeling.
6. Assessment is an ongoing and multidimensional process that is an integral part of instruction.
7. Making reading and writing connections across multiple sources and curricula facilitates meaning.
8. Literacy for the future means literacy in multiple technologies.
9. Education must respond to society's diverse population and serve all children.
10. Interactions among students, teachers, parents, and community form the network that supports learning.

GIFTED EDUCATION

Gifted learners are children and youth possessing outstanding talent who perform or show the potential for performing at remarkably high levels of accomplishment when compared with others or their age, experience or environment. As a result, they require differentiated educational programs to maximize their development.

BELIEFS ABOUT GIFTED KIDS

- Gifted children need access to differentiated instruction appropriate to their levels of intellectual, physical and social maturity (MSIP).
- It is critical to accommodate individual differences, interests, abilities, learning rates, and learning styles.
- Gifted students need contact with their intellectual peers to promote social-emotional development.
- Gifted children have specific social-emotional needs that must be addressed/are essential to full development.
- Gifted students need attention to the development of practical and social skills in the same way that all students do.
- Gifted students need opportunities to apply their abilities to real world problems. — Van Tassel-Baska
- It is a common preconceived, but not necessarily accurate, notion that gifted students will excel and achieve in all areas.
- It is imperative that the home and the school work together to ensure success for the gifted student.

COMMON PREMISES IN PROGRAM PLANNING

In order to plan a program, regardless of the variable used, there are several premises on which proponents of all viewpoints agree. These premises form the bases for sound programming.

1. The child's strengths are to be encouraged and developed.
2. The learning environment should provide opportunities for expanding one's knowledge and building more effective, cognitive, affective, and creative capabilities.
3. Arrangements must be made to accommodate individual differences, such as interests, abilities, learning rates, and learning styles.
4. Contact with other gifted children promotes social-emotional development.
5. A program should be responsive to the community it serves and involve families of children.
6. The curricula should promote these premises.
7. Evaluation is an indispensable part of effective programming.

*Colman, L. and Cross, T. (2001)
Being gifted in school: an introduction to development, guidance, and teaching
Waco, TX: Prufrock Press, p. 307*

GIFTED EDUCATION RATIONALE

Gifted learners are best served by a confluent approach that allows for accelerated and advanced learning, and enriched and extended experiences. —VanTassel-Baska, 1988

The School District of the City of St. Charles acknowledges the vital need to address the diverse learning requirements of all students; therefore, providing appropriate programming for gifted learners is an integral part of the educational process. Individual uniqueness of the gifted student is respected and addressed through a differentiated curriculum.

While providing high levels of complexity and challenge appropriate to gifted learners, the district recognizes that students come from diverse socioeconomic and cultural backgrounds and possess unique abilities and needs.

Gifted learners are also at-risk of underachievement and require customized programming to ensure their success.

In order to meet the unique needs of gifted students, the district offers gifted programming that transcends traditional subject areas through curriculum qualitatively different from the regular school curriculum by the degree of complexity of content, process, and products to challenge gifted students to achieve their highest potential.

Curriculum for gifted students is specifically designed to challenge advanced learners and provide experiences that require critical thinking, problem-solving, independent study skills, communication, and persistence in the face of challenges. When engaged in high quality gifted services, students will develop their unique abilities, maintain their passion for learning, and have the opportunity to contribute to the strength and vitality of our schools, district and community.

The St. Charles R-VI Gifted Program does not substitute or replace the excellent classroom instruction and enrichment already provided in the district. Instead, it provides options compatible with the needs, abilities, and interests of gifted learners.

FIRST & SECOND GRADE GIFTED CURRICULUM

Course Overview

Course Description

To reinforce gifted learners' critical, creative, learning, and social /emotional skills, it is vital that they are provided appropriately with challenging educational opportunities. The first and second grade SOAR students curriculum is designed to meet the gifted needs in the present setting and for them to use the skills for successful lifelong learning. The program provides multiple opportunities for collaboration through individual, partner, and group work. The program utilizes technology, STEAM projects, and assimilations. The focus will be for students to identify, analyze, and create educational tools based on their learned knowledge.

Big Ideas (units)/Duration

ALL UNITS ARE TAUGHT TO 1st AND 2ND GRADE STUDENTS TOGETHER (2 UNITS PER YEAR, ALTERNATE YEARS)

- **Water is Everywhere (1 Semester, approximately 16 weeks)**
- **Endangered Animals (1 Semester, approximately 16 weeks)**
- **Chemistry (1 Semester, approximately 16 weeks)**
- **Botany (1 Semester, approximately 16 weeks)**

Missouri Gifted Learning Outcomes

- **Creative and Innovative Thinking**
- **Critical Thinking, Systems Thinking, and Decision Making**
- **Problem Solving**
- **Social Emotional Learning**

UNIT 1 WATER IS EVERYWHERE

Standards Addressed	Big Ideas	
<ul style="list-style-type: none"> ● Goal 1-Students will acquire the knowledge and skills to gather, analyze, and apply information and ideas. ● Goal 2-Students will acquire the knowledge and skills to communicate effectively within and beyond the classroom. ● Goal 3-Students will acquire the knowledge and skills to recognize and solve problems. 	<p>Students will...</p> <ul style="list-style-type: none"> ● Analyze how the water cycle works all around us each day. ● Expand their knowledge on different extreme weather in our world. ● Learn how to clean and filter water and see how particles within our water even when very small can create problems all around. ● Develop a documentary explaining why water is a valuable resource. ● Reflect on their documentary and their peers to contribute to a class discussion about water. 	
Unit Duration	Enduring Understandings	Essential Questions
<ul style="list-style-type: none"> ● 1 Semester, Approx. 16 weeks 	<ul style="list-style-type: none"> ● Students will become aware of the damaging effects of water and collaborate ways to prevent future damage. ● Students will learn different ways that water can be used. ● Students will take a stand on preserving water in their community and the world. 	<ul style="list-style-type: none"> ● Where does our water come from? ● How do humans affect water resources? ● What is the structure and properties of water? ● What is human interaction with water and availability? ● What damage is caused by water? ● Why is water conservation necessary? ● How can you conserve water? ● How does water pollution occur? ● How can erosion affect the land? ● How can water create energy? ● How is global warming affecting water? ● How many ways can water be used?

Assessment Evidence

Rubric/Scoring	Assessment
One evaluation will be sent home each semester	<ul style="list-style-type: none"> • Students will self- evaluate daily • Students will be assessed on using the Engineering Design Process used in projects • Students will be assessed on Critical thinking skills used in projects • Students will be assessed on creative thinking skills used in projects • Students will be assessed on learning skills used in projects • Students will be assessed on social/emotional skills daily

Learning Plan

Days(s)	Topic	Resources/Texts	Learning Targets	Key Vocabulary	Assessment
Semester(appro x 16 weeks	Water Cycle	Clean water science	Introduce Water Unit	Water Cycle	Self Assessments done throughout activities.
	Natural Disasters	Water cycle puzzle	Review-What do you know about the water cycle? Create Water cycle in a bottle	Sun Continent(land) Oceans,	
	Pollution	Water cycle book	Talk about the different steps as a group. Have each child create their own diagram of water cycle in Google slides.	atmosphere, water vapor Water droplets	Daily Self Assessment completed each SOAR day.
	Water Conservation	Water cycle magnets		Evaporation Condensation	
	Water Protection	Mini observatory	Is water valuable to us? Do we have enough to last us our entire lives, as well as our children's lives?	Precipitation Solid	Evaluation completed per semester.
	States of Matter	Tornado experiments-Condensation	Show water experiment explaining how much water humans can actually use.	Liquid Gas Conservation	
	Erosion	3D Printer	What can we do to conserve water? Create posters to hang around school.	Pollution Energy Model	
	Environmental Changes	Metal Printer Funnel	Magic Schoolbus Wet all over Video		Organisms Environment Water sources
		Printer Resin Tank		What problems are currently being faced involving water? Think about creating a list and discussion piece to make this interactive.	Rivers Reservoirs Wells
		3D Pens			Runoff Oil Eroding Soil
Refill for 3D Pen			What are non-traditional ways water helps our community? (Water Power)	Animal waste	
	Mason Jars		Create a Bingo Game using Vocabulary words that are important in our unit(partner activity).	Identify Explain Analyze	
	Plastic Wrap				
	LightBox

- **Creative and Innovative Thinking**
- **Critical Thinking, Systems Thinking, and Decision Making**
- **Problem Solving**
- **Social Emotional Learning**

UNIT 1 SPACE

Standards Addressed	Big Ideas	
<ul style="list-style-type: none"> ● Goal 1: Students in MO public schools will acquire the knowledge and skills to gather, analyze, and apply information and ideas. ● Goal 2: Students in MO public schools will acquire the knowledge and skills to communicate effectively within and beyond the classroom. ● Goal 3: Students in Mo public schools will acquire the knowledge and skills to recognize and solve problems. 	<p>Students will...</p> <ul style="list-style-type: none"> ● Learn the names and order of all the planets from the sun and how their placement affects the planet ● The importance of asteroids and comets impacts our world ● How space education is important for all life in the future 	
Unit Duration	Enduring Understandings	Essential Questions
<p>(1 semester, Approx. 16 weeks)</p>	<ul style="list-style-type: none"> ● All people are capable of analyzing and solving challenging problems by creating ;new and purposeful solutions. ● The decisions that we make impact others. It is important to consider the implications and consequences of personal actions. ● Everyone can grow in their ability to think creatively and develop innovative ideas. 	<ul style="list-style-type: none"> ● How do I communicate my ideas effectively to an appropriate audience? ● How can I evaluate the effectiveness of my decision? ● How can I transfer my knowledge to a new situation? ● How can I transfer my knowledge and skills to a new situation?

Learning Targets

- Locate information from internet
- Design and create products to teach others
- Employ a teacher-selected problem-solving strategy and investigate novel student-selected strategies for solving problems
- See trends in systems and identify cause and effect relationships or multiple connections within the system
- Offer constructive feedback and incorporate suggestions for improvement
- Convey information clearly and concisely

Assessment Evidence

Evaluation	Assessment
One evaluation will be sent home each semester	<ul style="list-style-type: none"> ● Students will self- evaluate daily ● Students will be assessed on using the Engineering Design Process used in projects ● Students will be assessed on Critical thinking skills used in projects ● Students will be assessed on creative thinking skills used in projects ● Students will be assessed on learning skills used in projects ● Students will be assessed on social/emotional skills daily

Learning Plan

Days(s)	Topic	Resources/Texts	Learning Targets	Key Vocabulary
One semester 18 days	<ul style="list-style-type: none"> • Names and order of planets • Learn names and locations of major constellations • Moon phases • Asteroids • Comets • Lunar eclipses • Astronauts life • Rockets • Apollo project • Space station 	<ul style="list-style-type: none"> • NASA sights • Google drawing • Google • Brainpop: Internal Space Station • Brainpop: Solar System • Brainpop: Comets • Brainpop: Asteroids • Brainpop: Constellation • Posters • Space puzzles • Planet posters • Planet sets • Constellation posters • Asteroid & comet posters • Books on planets, constellations, comets, sun, asteroids, astronauts 	<ul style="list-style-type: none"> • Collect and analyze data to independently identify elements of issues • Apply abstract and analytical thinking skills modeled by others to define problems • Elaborate on given ideas, thoughts, products, or plans to create new possibilities 	<ul style="list-style-type: none"> • Astronaut • Asteroid • Axis • Comet • Constellations • Eclipse • Galaxy • Gravity • Lunar • Meteorite • Orbit • Phases satellite • Galaxy • Milk way • Names of 8 planets

FIFTH GRADE GIFTED CURRICULUM

Course Overview

Course Description

To reinforce gifted learners' critical, creative, learning, and social /emotional skills, it is vital that they are provided appropriately with challenging educational opportunities. The fifth grade Quest students' curriculum is designed to meet the gifted needs in the present setting and for them to use the skills for successful lifelong learning. The program provides multiple opportunities for collaboration through individual, partner, and group work. The program utilizes technology, STEAM projects, and assimilations. The focus will be for students to identify, analyze, and create educational tools based on their learned knowledge.

Big Ideas (units)/Duration

- Time Capsule
- Ancient Civilizations

Missouri Gifted Learner Outcomes

- Creative and Innovative Thinking
- Critical Thinking, Systems Thinking, and Decision Making
- Problem Solving
- Social Emotional Learning

UNIT 1 TIME CAPSULE

Standards Addressed	Big Ideas	
<ul style="list-style-type: none"> ● Goal 1 - Students in Missouri public schools will acquire the knowledge and skills to gather, analyze, and apply information and ideas. ● Goal 2 -Students in Missouri public schools will acquire the knowledge and skills to communicate effectively within and beyond the classroom. ● Goal 3 - Students in Missouri public schools will acquire the knowledge and skills to recognize and solve problems. ● Goal 4 - Students in Missouri public schools will acquire the knowledge and skills to make decisions and act as responsible members of society. 	<p>Students will...</p> <ul style="list-style-type: none"> ● Learn how the brain stores and retrieves information ● Develop a game to improve working memory ● Examine multiple perspectives in history ● Create a time capsule 	
Unit Duration	Enduring Understandings	Essential Questions
<ul style="list-style-type: none"> ● 1 semester 	<ul style="list-style-type: none"> ● The development of critical thinking skills and dispositions is a life-long endeavor. ● All people are capable of analyzing and solving challenging problems by creating new and purposeful solutions. ● An individual’s identity is a product of the dynamic interaction between personal and environmental factors. 	<ul style="list-style-type: none"> ● How do people grow as problem solvers? ● How can I use thinking tools to help me analyze and synthesize information? ● What makes me who I am?
Learning Targets		
<ul style="list-style-type: none"> ● Consider the implications of issues and their possible solutions on multiple communities (local, larger, global) ● See trends in systems and identify cause and effect relationships ● Apply abstract and analytical thinking skills modeled by others to define problems 		

- When working in groups, effectively work with group members to identify ethical implications of group processes and decisions and take a stand for personal convictions and demonstrate respect/ tolerance for other points of view
- Elaborate on given ideas, thoughts, products, or plans to create new possibilities

SEVENTH GRADE GIFTED CURRICULUM

Course Overview

Course Description

To reinforce gifted learners' critical, creative, learning, and social /emotional skills, it is vital that they are provided appropriately with challenging educational opportunities. The seventh grade Quest students' curriculum is designed to meet the gifted needs in the present setting and for them to use the skills for successful lifelong learning. The program provides multiple opportunities for collaboration through individual, partner, and group work. The program utilizes technology, STEAM projects, and assimilations. The focus will be for students to identify, analyze, and create educational tools based on their learned knowledge.

Big Ideas (units)/Duration

- **Board Games**
- **Forensics**
- **Survival**

Missouri Gifted Learner Outcomes

- **Creative and Innovative Thinking**
- **Critical Thinking, Systems Thinking, and Decision Making**
- **Problem Solving**
- **Social Emotional Learning**

UNIT 1 BOARD GAMES

Standards Addressed	Big Ideas	
<ul style="list-style-type: none"> ● Goal 1 - Students in Missouri public schools will acquire the knowledge and skills to gather, analyze, and apply information and ideas. ● Goal 2 -Students in Missouri public schools will acquire the knowledge and skills to communicate effectively within and beyond the classroom. ● Goal 3 - Students in Missouri public schools will acquire the knowledge and skills to recognize and solve problems. ● Goal 4 - Students in Missouri public schools will acquire the knowledge and skills to make decisions and act as responsible members of society. 	Students will... <ul style="list-style-type: none"> ● Examine how luck and strategy impact our daily lives ● Analyze a variety of games, paying attention to elements of luck and strategy ● Create an original board game for middle schoolers that includes elements of luck and strategy 	
Unit Duration	Enduring Understandings	Essential Questions
<ul style="list-style-type: none"> ● 1 semester 	<ul style="list-style-type: none"> ● There are different processes and strategies for solving problems. Being able to apply these processes and strategies may increase the probability of developing a successful outcome. ● Innovative thinking and creative thinking are vital to our progress as a society. ● Decision making requires a process of gathering, analyzing and applying information and ideas. 	<ul style="list-style-type: none"> ● How can I evaluate the effectiveness of my decision? ● How does collaboration expand the creative process? ● Why are there different strategies for solving problems?
Learning Targets		
<ul style="list-style-type: none"> ● Develop, test, and refine prototypes as part of a cyclical design process, evaluate the effectiveness based on teacher-identified success criteria, and explain the reasoning behind changes made in the iteration process 		

- Identify and test assumptions and determine where unintended consequences might arise
- Imagine, predict, and explore opportunities, situations, and ideas that do not yet exist in meaningful ways

 Assessment Evidence

MISSOURI GIFTED LEARNER OUTCOMES

Introduction

Gifted students need challenging curriculum, meaningful enrichment, accelerated learning opportunities, and appropriate social and emotional supports in order to make continuous progress in school. Gifted education programs provide opportunities for students to have enriched learning experiences across multiple curricular areas, addressing Missouri Learning Standards in core content areas, computer science, and fine arts. The unique academic, social, and emotional needs of gifted learners are addressed through the Missouri Gifted Learner Outcomes (MO-GLOs). The MO-GLOs can also guide gifted education specialists as they develop learner outcomes for their gifted programs.

Domains

The [Portrait of a Gifted Learner](#) directs the MO-GLOs. The Portrait of a Gifted Learner includes six domains: Complex Reasoning, Creative Thinking, Affective Processing, Executive Functioning, Global Mindedness, and Communicating Effectively. To deepen understanding, these six domains are further broken down into three or four strands. The MO-GLOs are divided into four grade bands (K-2, 3-5, 6-8, and 9-12) and focus specifically on three of the six domains: Complex Reasoning, Creative Thinking, and Affective Processing. Global Mindedness, Communicating Effectively, and Executive Functioning are embedded within those three domains. Icons are utilized to help identify the embedded domains.

Complex Reasoning: As gifted learners, students will develop the ability to apply problem-solving and critical thinking skills to create and test purposeful solutions, make decisions, support decisions with facts and logic, and understand how decisions and proposed solutions impact local and global communities.

Creative Thinking: As gifted learners, students will develop the ability to be open to new topics and thought processes, propose multiple detailed and original ideas, expand upon the thoughts of others, and recommend inventive solutions to new or unfamiliar concepts.

Affective Processing: As gifted learners, students will develop self-acceptance and self-awareness while demonstrating responsibility for their personal growth and engagement in their communities while embracing cultural and personal differences.

Missouri Show-Me Standards

The Missouri Gifted Learner Outcomes are aligned to the Missouri Show-Me Performance Standards:

Goal 1: Students in Missouri public schools will acquire the knowledge and skills to gather, analyze, and apply information and ideas.

Goal 2: Students in Missouri public schools will acquire the knowledge and skills to communicate effectively within and beyond the classroom.

Goal 3: Students in Missouri public schools will acquire the knowledge and skills to recognize and solve problems.

Goal 4: Students in Missouri public schools will acquire the knowledge and skills to make decisions and act as responsible members of society.

1. Complex Reasoning

Big Idea	As gifted learners, students will develop the ability to apply problem-solving and critical thinking skills to create and test purposeful solutions, make decisions, support decisions with facts and logic, and understand how decisions and proposed solutions impact local and global communities.			
Enduring Understandings	<ul style="list-style-type: none"> ★ EU 1.1 Decision making requires a process of gathering, analyzing, and applying information and ideas. ★ EU 1.2 The decisions that we make impact others. It is important to consider the implications and consequences of personal actions. ★ EU 1.3 The development of critical thinking skills and dispositions is a life-long endeavor. ★ EU 1.4 There are different processes and strategies for solving problems. Being able to apply these processes and strategies may increase the probability of developing a successful outcome. ★ EU 1.5 Through practice, we can grow in our ability to develop effective solutions to problems. 			
Essential Questions	<ul style="list-style-type: none">  EQ 1.1 How do I make and defend a well thought out and reasonable decision?  EQ 1.2 How do I use different strategies to effectively generate solutions that solve problems?  EQ 1.3 Why is it important to be able to solve problems and explain my reasoning?  EQ 1.4 How do my decisions impact the world?  EQ 1.5 How can I transfer my knowledge and skills to new situations?  EQ 1.6 How do I communicate my ideas effectively to an appropriate audience? 			
Grade Span Outcomes	K-2 Learner Outcomes	3-5 Learner Outcomes	6-8 Learner Outcomes	9-12 Learner Outcomes
Analyze Problem Situations and Identify Key Elements 	Collaboratively and independently identify elements of issues	Collect and analyze data to independently identify elements of issues	Independently collect and analyze data to identify multiple perspectives and views on issues	Using independently collected data, analyze issues using different perspectives
	Identify the main pattern of information needed to understand an issue	Identify the main pattern and minor patterns in information needed to understand issues	Consider evidence that disconfirms ideas and assumptions about issues	Investigate the characteristics of resources that may indicate bias such as loaded language, errors in reasoning, and the author's affiliation
Identify Possible	With guidance, identify possible solutions to problems	Develop possible solutions to problems	Develop multiple possible solutions to singular and multi-faceted problems	Develop complex possible solutions to multi-faceted problems

1. Complex Reasoning

Solutions and Success Criteria 	With guidance, identify success criteria for problem solutions	With guidance, identify success criteria for problem solutions and evaluate the possible effectiveness of proposed solutions to problems	Identify and justify success criteria for problem solutions and evaluate the possible effectiveness of proposed solutions to problems	Identify, rank, and justify success criteria for problem solutions and evaluate the possible effectiveness of proposed solutions to problems using defined success criteria
Evaluate Options and Explain Reasoning 	With guidance, differentiate the quality of possible responses to issues and explain reasoning	Independently determine criteria for evaluating and selecting responses to issues and support selections	Determine and justify criteria for evaluating and selecting responses to issues; apply criteria and defend selections	Use analogical reasoning to identify, explain, and give examples of analogies to support thoughts and ideas
Use Deliberate Processes for Solving Problems	With guidance, employ a teacher-selected problem-solving strategy	Employ a teacher-selected problem-solving strategy and investigate novel student-selected strategies for solving problems	Employ a student-selected problem-solving strategy and assess the effectiveness of the strategy	Employ a student-selected problem-solving strategy, analyze effectiveness, and defend reasoning for the selected strategy
Includes but not limited to: design thinking, engineering design process, creative problem solving, launch cycle				

1. Complex Reasoning

<p>Test, Analyze, and Iterate</p> 	<p>With guidance, develop and test prototypes and discuss what items could be improved in future designs</p>	<p>Develop, test, and refine prototypes as part of a cyclical design process with teacher-selected success criteria</p>	<p>Develop, test, and refine prototypes as part of a cyclical design process, evaluate the effectiveness based on teacher-selected success criteria, and explain the reasoning behind changes made in the iteration process</p>	<p>Develop multiple possible iterations, create structures for analyzing the success of prototypes, utilize self-determined success criteria to assess the effectiveness of their solutions, and defend their thinking with evidence-based research</p>
<p>Reflect on the Impact of Solutions</p> 	<p>With assistance, discuss the implications of issues on the impacted community</p>	<p>Consider the implications of issues and their possible solutions on multiple communities (local, larger, global)</p>	<p>Examine issues from multiple viewpoints while considering the implications on the community</p>	<p>Appraise global implications and consequences of historic and current world events</p>
<p>Systems Thinking</p> 	<p>Identify the parts of the system and explain connections within that system</p>	<p>See trends in systems and identify cause and effect relationships or multiple connections within the system</p>	<p>Identify and test assumptions within a system and determine where unintended consequences might arise</p>	<p>Make change in local/larger/global communities using systems thinking and utilize a variety of tools to understand systems thinking concepts and apply them to new problems</p>

1. Complex Reasoning

Logical Reasoning	Apply thinking processes to identify relationships between two familiar items or events	Apply thinking processes to analyze and organize sets of limited clues and reach logical conclusions ranging from general to specific	Demonstrate use of thinking processes that allow for a depth of thought by evaluating and justifying data that supports logical conclusions	Apply thinking processes to new situations when appropriate
	Includes but not limited to: pattern recognition, decomposition, abstraction, data analysis, critical thinking, systems thinking, algorithmic thinking, analogous thinking, deductive reasoning, inductive reasoning, abductive reasoning, convergent thinking, divergent thinking			
Communicate Ideas, Thoughts, and Messages  	Communicate complex ideas to reach a targeted audience	Effectively communicate complex ideas in a way that meets the need(s) of the intended audience	Effectively communicate complex ideas in a way that purposefully meets the need(s) of the intended audience	Effectively communicate complex ideas in a way that purposefully meets the need(s) of the intended audience
	With guidance, offer constructive feedback and incorporate suggestions for improvement	Offer constructive feedback and incorporate suggestions for improvement	Offer constructive feedback, analyze feedback received for effectiveness, and incorporate selected feedback	Adapt future communication using prior feedback

1. Complex Reasoning

Connected NAGC Standards

1.2. Self-Understanding. Students with gifts and talents possess a developmentally appropriate understanding of how they learn and grow; they recognize the influences of their beliefs, traditions, and values on their learning and behavior.

1.3. Self-Understanding. Students with gifts and talents demonstrate understanding of and respect for similarities and differences between themselves and their peer group and others in the general population.

1.5. Cognitive, Psychosocial, and Affective Growth. Students with gifts and talents demonstrate cognitive growth and psychosocial skills that support their talent development as a result of meaningful and challenging learning activities that address their unique characteristics and needs.

3.3. Responsiveness to Diversity. Students with gifts and talents develop knowledge and skills for living in and contributing to a diverse and global society.

3.5. Instructional Strategies. Students with gifts and talents become independent investigators.

4.3. Responsibility and Leadership. Students with gifts and talents demonstrate personal and social responsibility.

4.5. Communication Competence. Students with gifts and talents develop competence in interpersonal and technical communication skills. They demonstrate advanced oral and written skills and creative expression. They display fluency with technologies that support effective communication and are competent consumers of media and technology.

2. Creative Thinking

Big Idea	As gifted learners, students will develop the ability to be open to new topics and thought processes, propose multiple detailed and original ideas, expand upon the thoughts of others, and recommend inventive solutions to new or unfamiliar concepts.			
Enduring Understandings	<ul style="list-style-type: none"> ★ EU 2.1 Innovative thinking and creative thinking are vital to our progress as a society. ★ EU 2.2 Everyone can grow in their ability to think creatively and develop innovative ideas. ★ EU 2.3 Being open-minded when new and different ideas are proposed is an important aspect of allowing creative thought and encouraging innovation. 			
Essential Questions	<ul style="list-style-type: none">  EQ 2.1 What are creativity and innovation?  EQ 2.2 In what ways is creativity important and how does creativity play a role in self-expression and culture?  EQ 2.3 What conditions, attitudes, and behaviors support creativity and innovative thinking and what factors discourage creative risk taking?  EQ 2.4 How do I communicate my ideas effectively to an appropriate audience? 			
Grade Span Outcomes	K-2 Learner Outcomes	3-5 Learner Outcomes	6-8 Learner Outcomes	9-12 Learner Outcomes
Risk-Taking and Open-Mindedness   	Demonstrate with guidance adaptability skills when evaluating thoughts or plans of existing products through listening and asking questions	Demonstrate adaptability skills when evaluating thoughts or plans of original products through listening and asking questions	Appropriately discern teacher and peer feedback to revise original work	Demonstrate observable adaptability skills relating to individual creative pursuits including self-awareness, acceptance, and self-correction
Divergent Thinking	Effectively use teacher-selected strategies to encourage creativity with original products	Effectively use student-selected strategies to demonstrate creativity with original products	Use independent strategies to interpret others' works and create original products	Build products in performances, insight, techniques, and/or trial and error based on divergent thinking
Includes but not limited to: Brainstorming, F2OE, SCAMPER, Forced Connections, Mind Mapping				

2. Creative Thinking

Innovation Skills	Experiment with various materials and tools to create products related to personal interest or subject matter	Use materials, processes, and concepts in original ways to create a solution when given an expected outcome	Using a variety of materials, create an original product utilizing collaborative feedback	Explore the creative thinking process in various situations while developing a plan of action, maintaining creative flow, and adjusting the creative process based on feedback to create innovative products
Self-Expression  	Demonstrate appropriate verbal and nonverbal communication skills when expressing creative ideas	Practices self-reflection when evaluating creative processes using advanced verbal, nonverbal, and technological communication skills	Provides and receives effective feedback leading to improvement in verbal, nonverbal, and technological communication skills	Demonstrate advanced communication skills to influence differing viewpoints using a variety of resources, either independently or collaboratively

2. Creative Thinking

Connected NAGC Standards

1.1. Self-Understanding. Students with gifts and talents recognize their interests, strengths, and needs in cognitive, creative, social, emotional, and psychological areas.

1.2. Self-Understanding. Students with gifts and talents demonstrate understanding of how they learn and recognize the influences of their identities, cultures, beliefs, traditions, and values on their learning and behavior.

1.3. Self-Understanding. Students with gifts and talents demonstrate understanding of and respect for similarities and differences between themselves and their cognitive and chronological peer groups and others in the general population.

1.5. Cognitive, Psychosocial, and Affective Growth. Students with gifts and talents demonstrate cognitive growth and psychosocial skills that support their talent development as a result of meaningful and challenging learning activities that address their unique characteristics and needs.

1.6. Cognitive Growth and Career Development. Students with gifts and talents identify future career goals that match their interests and strengths. Students determine resources needed to meet those goals (e.g., supplemental educational opportunities, mentors, financial support).

3.3. Responsiveness to Diversity. Students with gifts and talents develop knowledge and skills for living in and contributing to a diverse and global society.

3.5. Instructional Strategies. Students with gifts and talents become independent investigators.

4.5. Communication Competence. Students with gifts and talents develop competence in interpersonal and technical communication skills. They demonstrate advanced oral and written skills and creative expression. They display fluency with technologies that support effective communication and are competent consumers of media and technology.

3. Affective Processing

Big Idea	As gifted learners, students will develop self-acceptance and self-awareness while demonstrating responsibility for their personal growth and engagement in their communities while embracing cultural and personal differences.			
Enduring Understandings	<ul style="list-style-type: none"> ★ EU 3.1 An individual’s identity is a product of the dynamic interaction between personal and environmental factors. ★ EU 3.2 Intrapersonal development is understanding oneself as the foundation for self-management. ★ EU 3.3 On-going self-assessment and reflection are essential to defining and enhancing an individual’s growth. ★ EU 3.4 Respect must be given to unique beliefs and experiences in oneself and others in order to develop empathy, social awareness, and leadership skills. ★ EU 3.5 Embracing giftedness and appropriately coping with stress is important to healthy, responsive interpersonal interactions and to becoming productive members of classroom communities and society. ★ E.U. 3.6 Lifelong learning is important to leading a life of curiosity, continued self-understanding, and global awareness. ★ EU 3.7 Executive functioning skills are the foundation of all learning and can be learned and directly taught. ★ EU 3.8 Everyone can develop the ability to manage and regulate choices (i.e.: planning, self-monitoring, time management, and organization). 			
Essential Questions	<ul style="list-style-type: none">  EQ 3.1 How does my giftedness impact the interactions in life that make me who I am?  EQ 3.2 How does my giftedness impact how others see me and how I see myself?  EQ 3.3 How do I respect others’ beliefs and experiences that are different from my own?  EQ 3.4 In what ways are executive function skills important and how does the development of my skills impact school and home life?  EQ 3.5 What conditions, attitudes, and behaviors develop skills and what hinders my development?  EQ 3.6 How do I communicate my ideas effectively to an appropriate audience? 			
Grade Span Outcomes	K-2 Learner Outcomes	3-5 Learner Outcomes	6-8 Learner Outcomes	9-12 Learner Outcomes
Intrapersonal Development 	Explore the relationship between their learning and giftedness	Describe benefits and importance of personal qualities, characteristics, and gifted identity	Be flexible and adapt to different social contexts and appropriately advocate as the gifted learner	Create and implement an actionable plan with strengths and areas of growth to have confidence in one’s identity based on gifted characteristics, talents, interests, and strengths

3. Affective Processing

	Identify and assess strengths and areas of growth as a baseline for growth	Identify an actionable plan with strengths and areas of growth to exhibit confidence	Apply knowledge of strengths and areas of growth to personal decision-making	Use knowledge of strengths and areas of growth to make decisions about their future
	Identify feelings and emotions in self and others (including varying degrees of emotional intensity)	Describe and demonstrate ways to express and respond to emotions (i.e., coping strategies) in a constructive manner	Evaluate the impact of appropriate and inappropriate emotional expression and behavior on self and others	Analyze and evaluate how emotions affect responsible decision making
Interpersonal Interactions and Leadership   	Respond in a truthful manner about self and others	Respond in a truthful manner about self and others and recognize ways to help peers complete tasks, goals, or address needs	Respond and act in a truthful manner even under adverse circumstances/peer pressure	Develop healthy relationships based on shared values, interests, goals, or reciprocity of support
	Work independently and in collaborative groups	Flexibly work independently and in collaborative groups	When working in groups, ensure and defend effective and ethical group decisions	When working in groups use socially appropriate strategies to express emotions and feelings, analyze different perspectives, and concern for each group member
	Collaborate and communicate with group members to complete a task	Exhibit behaviors that communicate understanding and respect for people who have a different point of view while completing a task	Communicate when there is a difference of opinion and respond appropriately; detect moods, temperaments, motivations, and intentions of others; and work collaboratively	Demonstrate empathy for each group member while engaging in communication when there is a difference of opinion

3. Affective Processing

Self-Regulation and Project Management  	With guidance, identify emotions related to school tasks and monitor behavior choices	At an age-appropriate level, identify emotions related to school tasks and self-monitor behavior choices	At an age-appropriate level, identify emotions related to school tasks and self-monitor behavior choices	At an age-appropriate level, identify emotions related to school tasks and self-monitor behavior choices
	Demonstrate the ability to organize, focus, and complete tasks in a timely manner	Demonstrate the ability to prioritize, time-manage, and focus on given tasks when given organizational tools	Analyze and apply motivation strategies and organization skills to persevere through difficult situations, tasks, or goals	Create short- and long-term goals using an action plan that includes necessary resources, specific steps, timeframe, and evaluation of both short- and long-term goals
	Demonstrate the ability to accept responsibility/take ownership for actions for given tasks and consequences for actions in a variety of situations	Explain how family members, peers, school personnel, and community members can support responsible behavior and school success	Analyze how making use of school and community supports can help one to complete goals and contribute to achievement in school and in life	Analyze how personal responsibility affects individual and group relationships and demonstrate the ability to take personal responsibility for one's behavior
Adaptability   	Be able to listen to multiple thoughts and perspectives	Be able to listen to and restate multiple thoughts and perspectives	Be able to listen to and restate multiple thoughts and perspectives, and rethink one's own position	Be able to listen to and restate multiple thoughts and perspectives, rethink one's own position, and discuss an issue from both sides regardless of one's personal opinion
	With guidance, stay with a task even if it's challenging	Without guidance, stay with a task even if it's challenging	Stay with a task even if it's challenging and meet the required goals/due dates	Stay with a task even if it's challenging and meet the self-imposed goals/due dates

3. Affective Processing

	With guidance, be an active and positive team member	Actively participate and contribute to the team in a positive manner	Actively participate, contribute to the team in a positive manner, help make team member assignments, and set team goals	Actively participate, contribute to the team in a positive manner, regulate self and others to set and accomplish team goals
