Downingtown Area School District Climate Survey Report

The Downingtown Area School District is dedicated to fostering a positive school environment where every individual experiences respect, value, and a sense of belonging. In pursuit of this goal, DASD has administered the PA Climate survey to students, staff, teachers, parents and guardians, and community members.

The survey covered topics such as Student Support, Social Emotional Learning, and Safe School Climate, featuring carefully crafted items to capture perspectives from stakeholders on actions taken, relationships, bullying, and a sense of belonging. This report aims to present an overview of the feedback received from the PA Climate survey, emphasizing essential insights, strengths, areas requiring improvement, and offering recommendations for the climate initiatives within the district. The table below provides an overview of the respondent count from each stakeholder group.

Stakeholder Group	Number of Respondents
Administrators	27
Teachers	524
Staff	290
Elementary Students (3-5)	2,273
Middle School Students (6-8)	2,304
High School Students (9-12)	2,450
Parents/Guardians	1,125
Community Members	68

These efforts directly align with DASD's strategic plan, specifically Goal 1: "Students feel Safe, Connected, and Engaged." By addressing metrics such as the percentage of students who feel safe, connected, and heard; regular attendance rates; co-curricular and extracurricular participation; and suspension rates across all demographic groups, this framework contributes to a more welcoming and supportive educational experience.

We appreciate that all of our students, staff, teachers, parents and guardians, and community members took the survey seriously and provided their perceptions of our school climate. Students responded to all questions, including those requiring inverse scoring, affirmatively.

Student Elementary Climate Report

Analysis

Strengths:

- Students feel generally safe in classrooms, with a high agreement in feeling safe in the classroom (3.74) and around the school (3.54).
- Teachers are perceived as supportive, with strong ratings for willingness to help (3.64) and fairness (3.31).

Challenges:

- Feelings of boredom in school (2.81) and a desire to switch schools (3.63) suggest potential areas for enhancing student engagement.
- Concerns about bullying (3.06) and students treating others with respect (3.26) point to a need for improved social-emotional learning and interventions addressing bullying and teasing.

Analysis

Strengths:

- **Perception of Safety:** The majority of students feel safe both inside the classroom (mean rating 3.68) and around the school (mean rating 3.48). This is a strong indicator of the overall positive safety climate in the school.
- **Supportive Teachers:** Teachers are perceived as willing to help students (3.64) and as generally fair (3.31), reflecting a strong sense of support in the school environment.

Challenges:

- **Bullying and Respect:** Responses regarding bullying (mean rating 3.01) and respect among students (mean rating 3.02) indicate concerns about the social-emotional climate. Although most students feel safe, there is an ongoing need for improvement in peer interactions and addressing teasing and bullying.
- **Engagement and Boredom:** With a low rating for student engagement (mean rating 2.81 for boredom), there is a clear opportunity to enhance curriculum and activities to better engage students and prevent disengagement.

Conclusions

Based on the responses from the Downingtown Area School District staff climate survey conducted between October 16, 2024, and November 20, 2024, the following key conclusions can be drawn:

General Perception of School Climate:

- The overall school climate, reflected in the Total Average School Climate Score (3.18), is moderately positive but highlights areas for improvement, particularly in social-emotional learning (2.76) and the perception of student support (3.33).
- The Safe School Climate Domain, while rated positively in many aspects, indicates some concerns, particularly related to bullying, violence, and student threats. The average rating for aspects of school safety ranges from 3.13 to 3.74.

Student Engagement and Social-Emotional Support:

- Although staff responses suggest that students generally feel connected to their teachers, there is a noted gap in the depth of social-emotional support available. With an average score of 2.76, this indicates that while some students might feel supported, there is a larger group who could benefit from more personalized attention and structured social-emotional learning programs.

Conclusions

General Satisfaction:

- The overall satisfaction with the school climate is positive, with the majority of parents agreeing that the school is supportive and inviting for students (3.42) and parents/guardians (3.29).
- Safety is a significant strength, with a strong majority agreeing that their child feels safe at school (3.41).
- Parents also report general satisfaction with their child's education (3.40) and fairness in how students are treated (3.39).

Communication and Involvement:

- Communication between parents and teachers is viewed as positive, but could benefit from improvement, as indicated by the mean rating of 3.26. Parents expressed a need for more engaging and consistent communication with teachers.
- While many parents feel involved in their child's education (3.24), there is a portion of respondents who feel less connected, as reflected by the lower response rates for active involvement (2.0% strongly disagree and 11.6% disagree).

Support for Diverse Needs:

- The school appears to be providing adequate support for students with learning challenges (3.26), with room for improvement to ensure that all students receive the necessary resources for success.
- The respect for cultural diversity at the school (3.38) and the high expectations set by school staff (3.34) show that belongingness is valued by the community.
