

CTE Automation Technology Scholarship

Sponsored by: Advanced Heating and Air Conditioning

Scholarship Information:

The CTE Automation Technology Scholarship is sponsored by Advanced Heating and Air Conditioning. This industry partner is dedicated to preparing students with the essential skills needed for technicians in several industries. A \$2,000 scholarship will be awarded.

The scholarship recipient must be a senior in high school within the Cache County School District pursuing ongoing education in an automated technology field. Added attention will be given to those who have participated in the AM STEM program and taken the CTE Internship course at their high school.

A \$2,000 scholarship will be awarded to a student who is pursuing a certificate through the BTECH Automation Technology Program. This is a 900-hour program. The total scholarship amount will be dispersed as follows: \$1,000 lump sum for tuition for one term. If the recipient successfully completes one term and continues to meet the requirements for the scholarship, the remaining \$1,000 will be awarded for the second term's tuition.

Tuition payments will be accommodated by the Cache Education Foundation (CEF). Payment will be made directly to the education institution once a student is registered and presents a tuition bill to CEF. Scholarship funds must be used within one year of the award date. The award may be postponed if the student has a good reason and submits an explanatory letter to CEF before June 30th of the award year.

Interested students should contact their CTE internship teacher, AM STEM teacher, or the high school counseling office for an application.
