

# Prevent Respiratory Illness with 8 Healthy Habits

It is common to get sick from respiratory viruses such as COVID-19, flu, and respiratory syncytial virus (RSV), especially in the fall and winter. There are actions you can take to protect yourself and others. The following healthy habits can help you prevent these viruses.

## **Cover Coughs & Sneezes**

Use a tissue or your sleeve to cover coughs and sneezes. You can wear a mask around others if you are sick.

## **Get Vaccinated**

Stay up to date on vaccines such as flu, COVID-19, RSV, and pneumonia to reduce the risk of infection and severe illness.

### **Wash Hands**

Wash hands often with soap and water. Use alcohol-based hand sanitizer if soap and water are not available.

#### Don't Touch...

Avoid touching your eyes, nose, and mouth. Never touch your face with unwashed hands.

## **Stay Home**

Stay home if you are sick. Stay away from others who are sick if possible.

#### Clean & Disinfect

Clean and disinfect surfaces and objects that are touched often. Follow instructions on the cleaning product label.

#### **Get Fresh Air**

Open windows or use air filters when possible to increase fresh air in the home, school, or office.

# Talk to Your Health Care Provider

Talk to your health care provider for respiratory illness prevention advice specific to your health risks.
