Subject: Accidents

Although reasonable effort is made by the district to prevent accidents to students, it is inevitable that accidents will occur. The Superintendent is directed to develop regulations and procedures to minimize promptly the effects of the injury, provide first aid and/or medical attention, to notify parents of the accident, and take whatever other steps are deemed reasonable in the interest of the student.

The Governing Board directs the Superintendent to seek review and input from the appropriate medical professional for all regulations pertaining to student accidents. These regulations shall be approved by the Board before implementation.

A complete accident report shall be made by the certificated staff member under whose supervision the accident occurs.
