

Liberty Union High School District

Board Policy

Classification: Instruction

Policy No. **BP6148**

Subject: Cross Curricular Credit

Page 1 of 1

Effective 6/27/90

Revised

Liberty Union High School District is committed to providing every student a common core of knowledge, skills, concepts, and values; however, this core of knowledge may be acquired in a variety of ways. Students may reinforce their basic academic and critical-thinking skills by applying theoretical concepts to practical tasks. Skills and concepts learned by students in vocational-technical education may be used as an alternate means to satisfy graduation requirements in core academic subjects when they are comparable (as identified by Administrative Regulations 1.0) to those taught in academic courses. Students may earn a maximum of ten (10) cross-curricular credits toward graduation in each core academic area.
