

"Every member of the clinical team is highly professional, highly flexible, compassionate, relatable, patient-centered, highly motivated—and truly cares about my recovery and my future."

- Jess, Connecticut

The Aspire365 program is designed to work around your schedule. All of our clients are able to maintain family, work, school, and social responsibilities while receiving the clinical support they need to re-build their lives and establish long-term health and wellness.

"Access to the clinical team is unparalleled."

- Nikki, Virginia

Aspire365 clients are paired with a multidisciplinary team of mental health professionals and have unparalleled access to clinical support 24 hours per day, 7 days per week.

LIVE WORK THRIVE WHILE RECOVERING

We bring the treatment to you

Live, Work & Thrive
While Recovering

About

The Aspire365 program is the culmination of multiple years of development in coordination with the best clinical professionals across the United States. To better address Mental Health and Substance Use Disorders as the chronic conditions they are, we deliver treatment to patients in their homes over a 12-month period. The lengthened treatment schedule allows for consistent implementation of the best evidence-based methods available. Upon completion of long-term in-home treatment, success rates exceed 70%.

Retirees enrolled in Medicare Three coverage or in the HealthTrust Medicare Advantage with Prescription Drug (MAPD) plan are not eligible to participate in Aspire365.

Treatment Approach

Aspire365 utilizes a multidisciplinary team of clinical professionals to deliver one on one personalized care. Within days of program enrollment, patients have access to:

Program Overview

- Serving adults and adolescents ages 12+
- Long-term Primary Mental Health, Primary Substance Use and Co-Occurring Disorder treatment
- Flexible services delivered in coordination with your schedule
- In-person & telehealth sessions
- Treatment plans tailored to fit individual and family needs

Evidence-based

“Aspire365’s long-term in-home treatment model gives people the greatest chance for success in achieving sustained recovery.”

Ellen Edens, MD
Professor of Psychiatry,
Yale School of Medicine
