

**Elizabethtown Area School District
Scope & Sequence - Quick Reference**

Department: Business, Computer and Information Technology

Course: Financial Investments

Grade Level(s): 10-12

Course Description: This course covers a step-by-step method of approaching smart saving and investing. Students will gain an awareness of various insurances-auto, health, home-owner's, and life insurance. The course also focuses on risk management, planning for retirement, safe investments such as online savings accounts and certificates of deposit to higher risk investments such as: mutual funds and stocks. Other skills covered are advanced spreadsheet skills and exploring the Internet for financial investment concepts and articles. Students learn how to analyze the value of stocks and appreciate the importance of investing for the future. Students will be actively engaged in an online stock market simulation with other students in class.
