

What is the 3:1 service delivery model?

And how is it used in our district?

PILOTED IN 2022

FULLY IMPLEMENTED IN 2022-2023

3:1

A type of evidence-based related service delivery model.

Used with Speech, Occupational Therapy, Physical Therapy, Counseling, and Social Skills services.

Consists of 3 weeks of direct service and 1 week of indirect service.

Benefits

Why 3:1?

- Improves quality and consistency of services by taking a comprehensive approach.
- Allows for collaboration between therapist and teachers on strategy and goal setting to address student needs in the **least restrictive environment**.
- Increases classroom carryover and supports generalization of skills.
- Provides flexibility to meet student needs throughout the district.

Direct Service

Time a student spends attending a therapy session and is working directly with the therapist.

e.g. Speech, OT, PT, Counseling, Social Skills sessions

VS.

Indirect Service

Time a therapist spends working on things related to a student's services but not directly with the student.

e.g. teacher consultation, student observations, progress monitoring, etc.
