Process Update

Task Force Exercise – February 13

Task Force will review options and respond to the following questions:

- How well does this option create elementary schools that meet the minimum capacity/enrollment requirements?
- How well does this option result in overall efficient utilization of buildings within the pyramid?
- Of the remaining buildings in this option, are the actions at each building appropriate for the long-term need? If not, what would you propose (example; capital improvements vs. long-term replacement)?
- Do you still believe this is a viable option to present to the community?
- Would you make any modifications to this option?
