Philosophy of Care:

Therapy is a great tool to use during difficult times. Therapy is an ongoing journey of self-knowledge, healing and growth. I help client's learn about themselves, developing new ways to cope through personal challenges and find the confidence to navigate through them. My approach to therapy is collaborative and patient centered.

Clinical Interest:

I have an eclectic approach to counseling and tailor treatment interventions according to each client's needs. I use components from Dialectical Behavior Therapy (DBT), Cognitive Behavioral Therapy (CBT) and mindfulness. I work to cultivate a safe, non-judgmental and validating environment.

Personal Interests:

I enjoy staying active with playing golf, practicing yoga, Orangetheory Fitness and watching sports. Also, spending time with my husband and three daughters.
