ENROLLMENT UPDATE

PURPOSE

The purpose of this presentation is to:

- Inform the Board of Trustees of district and school enrollment projections for the next 5 years
- Provide required information to better understand enrollment projections and variances that occur in these projections
- Provide an update on District transfer programs and better understand their effect on the enrollment of District Schools

TERMS: SPECIAL ENROLLMENTS

Ungraded Secondary (US) enrollments are students receiving Special Education services beyond Grade 12.

Non Public School (NPS) are students attending specialized schools for students with special needs pursuant to an Individualized Education Program (IEP).

Community Day (CDS) students attend an Educational Options school located on the District Office Campus.

Though all of these are counted in District enrollment reported to the State and County, they are not always reported when providing Gr. 9-12 District or school enrollments.

TERMS: INTRA DISTRICT TRANSFERS

Intra District Transfers are when students transfer from one FUHSD school to another FUHSD school. Examples of these types of transfers are:

- The Lynbrook and Monta Vista Supplemental School Assignment Programs (LSSAP and MSSAP)
- Placement Advisory Committee (PAC) transfers
- Special Support Programs such as Special Education and English Language Development

TERMS: INTER DISTRICT TRANSFERS

Inter District Transfers are when students transfer into FUHSD from another District. Examples of these types of transfers are:

- Employee Privilege
- Senior Privilege
- Other special circumstances or appeals

TERMS: ATTENDING VS RESIDENT ENROLLMENT

Resident enrollment is based upon where students reside and the corresponding school for that area/attendance boundary.

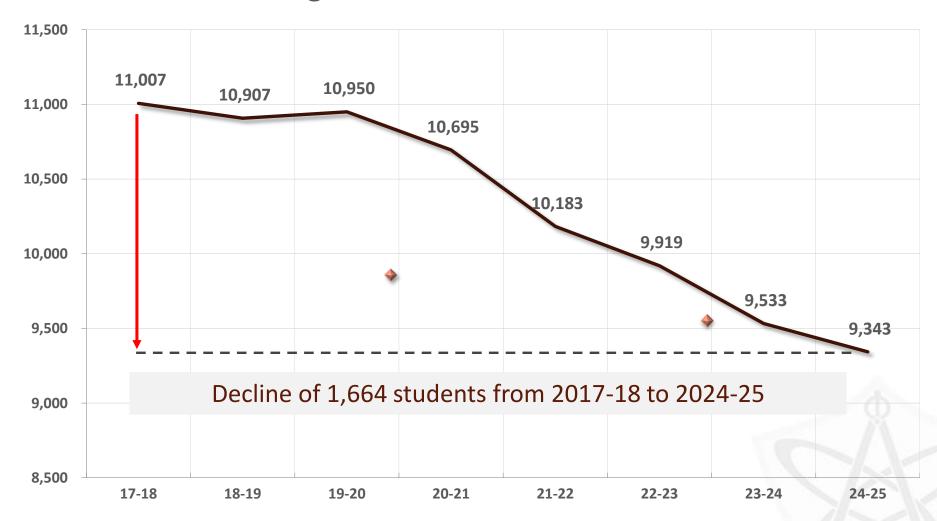

Attending enrollment is based upon where the students actually attend school.

Attending enrollment differs from resident enrollment because of inter and intra district transfers.

DISTRICT ATTENDING ENROLLMENT

Attending Enrollment: 1-Year Actual and Projected

This data <u>does not include</u> Non Public School or Ungraded Secondary Students

ENROLLMENT PROJECTION REPORT

Each year, the District receives enrollment projection data from Enrollment Projection Consultants (EPC). EPC has been providing neighborhood-specific forecast studies for FUHSD since 2005.

EPC specializes in in-depth studies, where each key component of the recent trends is determined, analyzed, compared to the knowledge gained from their experience in over 400 previous studies, and then projected.

ENROLLMENT PROJECTION REPORT

EPC has been accurate in its short term and long term projections for the District. The District relies on enrollment projections to inform our decisions on hiring, staffing, classroom needs, course offerings, budgets, construction and more. Therefore, having accurate and reliable projections is vital to our success.

Enrollment data provided by EPC focuses on **resident** enrollment. The District then uses that data and creates **attending** enrollment projections based on intra and inter district transfer trends and planned changes.

HIGHLIGHTS FROM FORECAST REPORT

Enrollment Projection Consultants Annual Enrollment Forecast Report 2024-25

There was a huge shift in how the enrollment progressed into most of the sixth through eleventh grades in the last two years, compared to the trends in all prior years since 2016, with the result of a much smaller decline now being forecast for the Fremont Union High School District.

Of the twelve school districts that we are now analyzing and made forecasts for from a year ago, Sunnyvale SD is the only district that had a total enrollment increase from 2023 to 2024.

While a decline in the total is still projected because of smaller incoming classes for ninth grade than those graduating from twelfth grade, the degree of decline is by less than in our past reports.

Since 2018, the total K-12 enrollment has decreased by **1,519** students (7,522 to 6,003) This is a 20% decrease in 6 years.

Noticeable changes in the progression pattern from Gr. 8 to Gr. 9 the following year:

$$2019 \text{ to } 2020 = +9$$
, $2020 \text{ to } 2021 = +39$, $2021 \text{ to } 2022 = +51$,

Also an increase in progression pattern from Gr. 5 to Gr. 6 (Elem. To Middle School)
