SCIENCE TECHNOLOGY ENGINEERING ART MATH

FAIR

INFORMATION:

WHO CAN PARTICIPATE?

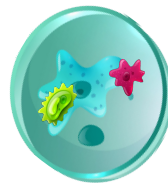

Are you curious about the world around you and how things work? Do you enjoy creating experiments to test your ideas? Have you ever thought of an invention or a way to improve something that already exists? If so, the **STEAM Fair** is the perfect opportunity for YOU!

HOW DO I PARTICIPATE?

Choose either a **Scientific Investigation** or an **Engineering Design** project to present at the STEAM Fair! Projects and experiments should be completed at home, and you're welcome to work individually or in teams. To showcase your work, create a display for the event. Since table space is limited, we recommend using a **22" x 28"** poster board. The PTA will provide poster boards, which can be picked up in **early March**.

WHEN IS THE STEAM FAIR?

March 27, 2025 — 5:30-7:30pm
in the Howe Auditorium and Gym

HOW DO I SIGN UP?

Use the QR code or link in the Howe newsletter to sign up by March 9th. If you are working on a team, only one submission is required. Please include the name(s) of your teammates.

NEED HELP?

Need help getting started on your **Scientific Investigation** or **Engineering Design Project**? Helpful resources are available through links in the **Howe newsletter** and on the **PTA website** to guide you step by step. If you need a **quiet room accommodation** due to sensory sensitivity, please indicate this on the form. For any additional questions, feel free to contact us at sciencefair@howepta.org.
