

# Fund-A-Need

## Outdoor Learning Space

### Goal: \$150,000

One of the most unique parts of Cathedral High School is its ability to blend academic excellence with spiritual growth, and the creation of an outdoor learning space will further enrich this mission. This space located next to Cunningham Fine Arts Center will allow students to connect with nature, enhancing focus, reducing stress, and fostering overall well-being, while also providing a place for spiritual reflection amidst the beauty of God's creation. By supporting this initiative, you are helping us create an environment where students can learn, grow, and reflect in a setting that nurtures both mind and spirit.

"This space would allow students to explore scientific concepts firsthand, reflect on the beauty of creation in theology classes, and find inspiration for art and literature".
