

Directions for Searching for Library Books in the Online Catalogs

The Chambersburg Area School District uses Follet's Destiny Online Catalog system for keeping track of the books that are purchased for the Chambersburg Area School District's libraries. Destiny allows students to see which books are available in their school's library.

To Search for a Book:

1. Do a Google search for CASD. Select the Chambersburg Area School District homepage.
2. From the menu at the top right, select, "Departments."
3. From the departments page, use the alphabetical listing to select Library Services.
4. From the menu on the left hand side, select "Destiny Library Catalog."
5. From CASD's Destiny homepage, you can select the school you wish to search.

Note: If your student attends CAMS South, there are 2 libraries, the East Library and the West Library. Students at CAMS South have access to both libraries. Therefore, you will need to search both libraries' catalogs.

From the catalog page you can search in the following ways:

- Keyword
- Title
- Author
- Series

Once you conduct your search, you can see the following about your search:

- If that school owns the book.
- If it does you will see the following:
 - Title
 - If the book is available in that library.
 - The call number (location in the school library)
 - The author listed by last name, first name
 - Any sublocation, series information, year published and reading level.

Clicking on the title of the book will give you additional details about the book.

If you have any questions about this process please email the librarian for the school in which you are searching the catalog.
