Safe & Ethical Behavior – Grade K

Dear Families/Caregivers,

We are learning about the difference between helpful and harmful behaviors. A helpful behavior is something a person does that treats others with kindness, but a harmful behavior is something a person does that hurts the feelings or bodies of others.

Some ways to respond to harmful behaviors are:

- Tell the person to stop the harmful behavior.
- Leave if you feel unsafe.
- Tell a safe adult.

Supporting Your Child in Practicing Helpful Behaviors

- Encourage your child to tell an adult if they see someone doing something harmful to them or others.
- Share examples of helpful behaviors with your child like sharing, including others, working together, and using kind words.
- Act as a model for your child by practicing helpful behaviors with and around them.

Thank you for your support.
