Values – Grade 1

Dear Families/Caregivers,

We are learning about what we do with our families.

Families are unique in how they:

- have fun together
- work together
- care for each other

Supporting Your Child in Identifying How Their Family is Unique

- Look at a family album together and talk about the different family members in your family.
- Talk about what family means to you and how your family has fun, works together, and cares for each other.
- Include your child in the planning process of your family traditions.
- Encourage your child to identify what your family likes to do for fun.
- Choose something that your family likes to celebrate and invite your child to make a drawing or write a story about it.

Thank you for your support.
