Values – Grade 5

Dear Families/Caregivers,

We are identifying the values that are represented at our school. Identifying our values can help students make choices at school that align with the values of the school.

Supporting Your Child in Connecting to Their Values at School

- Talk with your child about your family values, where they come from, and why they are important.
- Support your child with identifying their schools' values and making choices that promote the school's values.
- Talk with your child about ways they can represent their own values while at school.

Thank you for your support.
