

EVALUATION OF INDIVIDUAL STUDENT PERFORMANCE

Emergency Situations

In response to State directives when weather events and other circumstances render in-person meetings less than optimal, the chief school administrator in consultation with the director of curriculum may adopt a pass/fail grading system. The determination of the pass or fail grade shall at a minimum be based on the student's comprehension of the material as demonstrated on assignments and examinations; and student effort and participation with other structures implemented by the district or school to provide continuity of instruction during the school closure.

Grading

The chief school administrator, in consultation with the teaching staff, shall develop a marking system to be used uniformly in the same grade level throughout the schools. The system should be clear, easily understood by parents/guardians and pupils, and able to be applied with consistency of interpretation. Computation of grade-point average and rank in class shall be uniform throughout the district. Evaluation and grading symbols shall be intended to appraise the pupil's progress toward established goals, and shall be a factor in promotion/graduation decisions.

The board of education encourages the certified staff, under the direction of the chief school administrator, to employ a comprehensive approach to the use of appraisal and evaluative techniques in monitoring pupil progress, including, but not limited to, written and oral teacher-made tests, performance observation, parent/guardian interviews, formal and informal evaluation techniques, use of cumulative pupil records, and medical examinations. Recognized standardized achievement tests may also be used in grades designated by the board.

The chief school administrator shall have the right to review disputed grades and with board approval to adjust them.

Testing

In addition to testing procedures established in policy 5120 Assessment of Individual Needs, the school district shall establish and maintain a general testing program to:

- A. Improve the instructional program to assist pupils in achieving the Core Curriculum Content Standards including the Common Core State Standards in mathematics and language arts and literacy;
- B. Measure the needs and progress of individual pupils;
- C. Measure the achievement of grade levels;
- D. Allow comparison of district pupils with national or other norms;
- E. Aid in evaluation of programs.

The district testing program shall embody at least the tests required by state and federal law. The administration shall continually scrutinize the applicability and effectiveness of tests being used in the district.

EVALUATION OF INDIVIDUAL STUDENT PERFORMANCE (continued)

School personnel shall not use tests, procedures or other guidance and counseling materials that are differentiated or stereotyped on the basis of race, color, creed, religion, gender, gender identity or expression, affectional or sexual orientation, ancestry, national origin, nationality, disability, marital status, familial statuses, pregnancy or social or economic status.

Any requests for surveys, pupil observations, or pupil questionnaires must be forwarded through the principal's office to the chief school administrator's office for approval before any survey or observation can be conducted. If the survey concerns any of the topics described in statute, the chief school administrator shall obtain written consent from parents/guardians or the students being surveyed at least two weeks prior to its administration.

Individual results of standardized tests, including intelligence tests, shall be made available to parents/guardians upon their request, but shall be considered confidential information to be available only to authorized persons. School and district test results shall be discussed in a public meeting.
