

Recovering Deleted Items in Canvas

Canvas has an undelete feature that can bring back deleted announcements, quizzes, assignments, and discussions along with the associated grades. So, if you delete something in Canvas and decide you need to get it back, you may be able to.

To Undelete an Item in Canvas:

- Open the course where you deleted the item.
- Click **Home** in the navigation pane on the left.
- Click at the end of the URL in the browser address bar. Your URL should end with courses/XXXXXX where XXXXXX is a number.

<https://paulding.instructure.com/courses/46727>

- Add /undelete at the end of the URL.

<https://paulding.instructure.com/courses/46727undelete>

- Press Enter.
- On the undelete page, you will see any item(s) that can be restored.
- Click the restore button next to an item to restore it to the course.

The screenshot shows a list of items on the undelete page. The first item is titled "Miscellaneous" and is a "WikiPage" created on Feb 28 at 11:17am and last updated on Apr 17 at 3:46pm. A "restore" button is circled in red next to it. The second item is titled "Welcome!" and is also a "WikiPage" created on Feb 28 at 11:13am and last updated on Mar 1 at 10:16am. A "restore" button is next to it.
