

Teacher Review:

Value:

-I believe P.A.S has provided my students with an additional avenue to build on their communication/social skills when interacting with one another

-I also believe this program has helped highlight certain behaviors, and has allowed some students to recognize their own hurtful behavior as well as how being on the receiving end can be hurtful and making them aware of their hurtful actions towards other people.

Growth in students:

-Through the course of P.A.S visits I've noticed a level of some degree in one of my more challenging students. Maybe not in the heat of the moment but during those restorative conversations of them being able to take accountability in some way and acknowledge why someone else may have been affected by their actions.

-I've also noticed more initiative from students as far as being able to apologize in smaller scenarios without me as the adult having to intervene, and I highlight those moments by telling them how proud I am and how I appreciate them communicating appropriately amongst one another.
