

Training Volunteers to Assist with Hearing and Vision Screenings

Below you will find links and photographs to help better train you in how to assist the school nurse in screening students in hearing and vision. Please click on the video title below which is a link to the video, along with reviewing the photographs prior to the screening date scheduled for your school. You will also find samples of how to complete the hearing and vision form for each student based on their results. Let your school nurse know if you have additional questions in how to perform a screening.

A big **THANK YOU** for assisting the nurse with mass screenings of students!
