

Building Stronger Schools & Brighter Futures Together

VOTE August 7

BOND FACT SHEET

Our District is in need of funds to address citations identified in the Mississippi Department of Education audit and to provide needed upgrades to support quality learning.

Jackson Public Schools has the opportunity to issue general obligation bonds (GO Bonds) to fund capital improvements at various schools in the District. The total amount of approximately $65 million will be used directly toward making building improvements, renovations and/or construction at our schools.

Potential projects include:

- Replacing HVAC units at Forest Hill High School and Callaway High School.
- Completing the renovation of Newell Field.
- Adding science labs at all middle and high schools.
- Redesigning libraries to include internet cafés and other learning spaces for students.
- Updating the auditorium/performance space at Power APAC.
- Building a performance space at Forest Hill High School for APAC programs.
- Various infrastructure projects at schools, such as replacing carpets and windows, paving parking lots and other such projects.

The District paid off some existing debt in April 2018 and now has the opportunity to reissue the debt to get these additional funds. Because the existing debt was already being paid by taxpayers, reissuing the same amount will not cause any increase in taxes paid by homeowners for Jackson Public Schools.

The date of the election is Tuesday, August 7.

*The aggregate cost of all proposed individual projects listed are estimated not to exceed $65,000,000. The individual projects included may vary depending on a number of various factors, including but not limited to, the receipt of construction bids, the availability of bond proceeds, leverage loan proceeds, note proceeds and any additional funds, if applicable to the project. The inclusion of the projects listed does not prohibit the District from including additional projects and/or bind the District to the projects included in the above list.

The District is committed to approving final projects based on industry standards and best practices to maximize instructional needs and promote student achievement.
