

Algebra II – Mastery Exam Topics

- Simplifying Expressions
 - Negative and Positive Exponents
 - Rational Exponents
- Linear Functions
 - Compound Inequalities
 - Systems of Linear Equations
 - Solving and Graphing Absolute Value Equations and Inequalities
 - Piecewise Functions – graph and find equations
 - Setting up and solving linear word problems (including inequalities and linear programming)
- Rational Functions
 - Simplifying Rational Expressions
 - Complex Fractions
 - Adding, Subtracting, Multiplying and Dividing Rational Expressions
 - Solving Rational Equations
- Transformations
 - Basic graphs of parent graphs (Quadratic, Absolute Value, Cubic, Radical, Exponential, Linear, Circles, Rational, Sine, Cosine, Tangent)
 - Shifting and stretching parent graphs
 - Domain and Range
 - Composition of functions
- Quadratic Functions
 - Factoring
 - Solving Quadratic Equations with multiple methods
 - Graphing
 - Factoring
 - Completing the Square
 - Quadratic Formula
 - Graphing Quadratic Functions from Multiple Forms
 - Standard form
 - Vertex form
 - Factored form
 - Converting between standard form and vertex form by completing the square
 - Solving Systems of Nonlinear Equations
 - Writing quadratic functions from a situational word problem
- Radicals
 - Complex Numbers
 - Solving Radical Equations, including identifying extraneous solutions
 - Building and graphing equations of circles

- Exponential and Logarithmic Functions
 - Creation and graphical representation of inverse functions
 - Prove if two functions are inverses
 - Converting between logarithmic and exponential forms
 - Simplifying exponential and logarithmic expressions
 - Solving exponential and logarithmic equations
 - Power, Product, and Quotient properties of logarithms
 - Graphing logarithmic functions
 - Setting up and solving problems involving exponential growth/decay
- Trigonometry
 - Unit circle
 - Graphing and shifting of sine, cosine, and tangent functions
 - Modification of period, phase shift, vertical shift, and stretch
 - Radian measure of an angle
 - Modeling situations using shifted trig functions
 - Computation of trig values in all four quadrants with radian and degree measure
- Polynomials
 - Fundamental theorem of algebra
 - Sketching graphs of higher degree polynomial functions
 - Polynomial long division
 - Using long division and factoring to solve higher order polynomial functions
