

Retaining Wall

296' of Retaining Wall Needs Repair

The Repair - Helical

- Install mesh to keep the water away from the wall
- Install Shockcrete nails (20' long)
- Install another wall on top
 - 1-foot-thick concrete 4000 PSI
- Corrosion Protection
- Cost Range \$820,000 (plus additional costs for OPM oversight if we decide we need it)
- Timing: about 3-4 weeks in July

Propose to repair the entire length of the wall

More cost
effective to repair
entire wall due to
cost of
mobilization

They can repair
the wall at a rate
of 100'-200' per
day

This would be a
more permanent
fix as opposed to
a fix that will last
a decade.
