***My favorite thing about Gateway is watching the student's build their skills everyday with different staff members. Gateway means the world to me I am here to watch the progress and growth in many different areas including building their communication skills , working with PT on different gross motor skills, and working with OT on different fine motor skills. Gateway is my second home and I love coming to work to see all of these different skills the students work towards everyday. I absolutely love everyone I work with, and each one's these students. Gateway has a special place in my heart and the love I have for these children will always be so special to me. I am very blessed to see this everyday as we all work together as a team.***
