

Welcome Tour of LSU Health Shreveport Video Text Transcript

Audio	Video
(Announcer) Welcome to LSU Health Shreveport. (Music up)	LSU Health Shreveport Logo over montage: -Arial view of campus -Drone shot of Medical School building with logo -Drone shot of front Allied Health Building -Drone shot rising on Center from Medical Education from corner
(Music down) (Announcer) Over 9500 health care professionals have trained through the Schools of Medicine, Allied Health and Graduate Studies,	Text: 9500 graduates Over montage of: -female patient in shorts doing step exercises on bars in physical therapy clinic as female therapist looks on -residents at computer looking at brain image -Physical therapy students gait training with walker in clinic
providing a profound impact	female graduate student at mechanical hood syphoning liquid from a vial
on health care in North Louisiana	Close up of surgeon wearing special magnifying glasses
and beyond. Many will stay in the area	Surgeon at OR table with nurse and assistant
to continue their training and begin their practice,	Teenage girl testing knee strength in PT clinic as therapist looks on
bringing much needed expertise and economic impact to the region.	Male doctor in white coat looking in ear of male patient
The School of Medicine currently has 624 students training to be physicians. With the opening of the new	Text: 624 students over montage of: -Exterior end corner of Center for Medical Education -physician demonstrating proper hand placement to a male student on reclining, shirtless patient getting a heart ultrasound
155,000 square foot Center for Medical Education,	Exterior shot Center for Medical Education
LSU Health Shreveport has reimagined	Two medical students at table discussing something on a computer
the student experience by creating a centralized	Female student tests for a vein in a mannequin arm as another student assists
and innovative hub for medical education.	Male resident in scrubs demonstrating how to tie a surgical knot to a seated, bearded student

An active, flipped classroom, educational model	Wide pan of an auditorium with a large number of students seated around tables
enhances development of critical thinking,	One female and one male student seated at a table in the auditorium listening to a presentation
problem solving,	Group of female students seated at a table in the auditorium looking at their computers
and scientific knowledge.	Chancellor at podium in the center of a round auditorium full of students and faculty
Technology plays an early and continued role in our students education	Inside a control room full of computers and technicians overlooking a group of students inside a simulation room
through the use of state of the art simulators,	Large hospital ward room with 2 high fidelity patient simulators in hospital beds
task trainers,	closeup of male medical student placing an IV in a mannequin arm as 2 other students look on
and our expansive surgical skills lab.	Wide shot of surgical simulation room with 2 groups of doctors around separate operating tables
Students work closely with world class physicians	Female doctor seated beside a male student demonstrating knot tying
and scientists in the classrooms,	Behind a bald scientist at a podium with an auditorium full of students watching his presentation
labs, and in the clinics,	Closeup of 2 women pointing at a gel plate
interacting with patients, both real and actors, from the very beginning of their training.	Inside clinic hallway as female student knocks on clinic door and enters while a male student takes a seat at a desk in the background
Partners like Ochsner LSU Health Shreveport offer students a chance to learn	Exterior of the exterior of Ochsner LSUHS hospital connected to the LSUHS medical school
learn from faculty doctors,	-Female doctor listens to a seated patient's heart as a male doctor looks on
as well as 609 residents and fellows	Text: 609 residents and fellows Mixed group of residents, faculty, and students in scrubs sitting around a conference table watching a presentation off screen
training in one of our 47 accredited specialty programs.	Heart catheterization lab with two doctors at head of bed doing a procedure while watching a monitor Text: 47 accredited specialties
Students choose LSU Health Shreveport for the family atmosphere	Inside on campus gym with a student bar lifting and a student using body weight ropes in front of mirror with a student on a rowing machine
and for the significant clinical and research opportunities	Male faculty doc and female fellow walk down clinic hall wearing white coats

made possible through access to North Louisiana's	Closeup of female students looking through microscope
only level one trauma center, level two pediatric trauma center,	Text: Level 1 trauma center Group EMTs and nurses push trauma patient on a gurney toward the camera and away from a helicopter in the background
and nine research centers.	Text: 9 research centers High exterior of the research building at LSUHS
The physicians who train our students, residents, and fellows also treat patients.	Female Resident wearing a mask holds an instrument to the neck of a patient facing away from the camera. A female doctor, also in a mask, corrects the positioning of the device
They come to Shreveport because of our academic health center,	Male doctor explaining an ultrasound image on a screen facing away from the camera as a male student moves the probe along the femoral artery of a simulation as a male and female student watch.
with many bringing specialized treatments not available anywhere else in the area.	Doctor in scrubs seated at a Davinci surgical robot's controller
The School of Allied Health Professions is currently training 374 students as	Exterior high shot of front of Allied Health Building Text: 374 students
physician assistants,	Female PA student listens to heart of female patient
occupational therapists,	Occupational therapist holds belt of patient as she draws on a monitor while balancing
respiratory therapists, and more.	Male respiratory therapist student attempting to intubate a pediatric mannequin
They have ten degree programs offering bachelor, master, and doctorate degrees	Physical therapy class in PT clinic as instructor demonstrates lifting a student from a wheelchair Text: 4 Bachelor Degrees Text: 4 Master Degrees Text: 4 Doctorate Degrees
with residency programs in neurologic	Patient on harness walks across screen as therapist tosses her a ball Text: Neurological Physical Therapy
and orthopedic physical therapy	Physical therapist works on the shoulder of a patient laying down Text: Orthopaedic Physical Therapy
and wound management,	Therapist in surgical gown, mask, and gloves works on the foot of a seated patient Text: Wound Management

plus a clinical psychology internship.	Photo of a child on an indoor swing as therapist blows bubbles Text: Clinical Psychology Internship
Allied health professionals diagnose and treat	Photo of child jumping off an indoor play area
Children with conditions like autism and ADHD	Photo of child on indoor trampoline playing peek-a-boo with therapist
in the Children's center	Exterior photo of children's center sign
and offer audiology, speech and language	Behind a patient in a hearing test booth as she raises hand
services to both children and adults	Therapist flipping pages of comprehension test with teenage boy
in the nearby Mollie Webb Speech and Hearing Center.	Exterior of Mollie E. Webb
The rehabilitation clinic provides physical, occupational and speech language therapy to children	Inside PT clinic young female patient works on arm strength as male patients does leg lifts
and adults with orthopedic, neurological and wound conditions.	Patient using balance board to move icon around a TV screen
The School of Graduate Studies offers PhDs in six programs,	Female graduate student looking in microscope while mentors look on Text: 6 PhD programs
two Master of Science degrees,	In lab, female graduate student measures a powder with older male mentor Text: 2 Master of Science
and a combined MD PhD program.	Hands working with vials in ice bath tilt up to face of female medical student in lab Text: Combined MD/PhD Program
The 103 students begin working in labs during their first semester,	Closeup of hands pipetting, zoom out to reveal female graduate student working in lab Text: 103 Student
with faculty providing close mentorship to each student	Female scientist discussing gel plate with male and female students
to help them succeed in defining and achieving their goals.	Male scientist holding up vial while talking with two male students
Students have the opportunity to mentor high school and college students through	Female graduate student pointing to data on a computer as male student listens
a variety of summer programs	Female student pipetting in lab
offered across the state.	Male scientist pointing out data to a female student
The School of Graduate Studies prepares students to become biomedical scientists,	Male scientist in lab looking a vial
contributing to advances in health care and biotechnology,	Female student pipetting in lab
as well as educators who are equipped to	LSUHS graduate at podium in front of 2 large projector screens
to train and future generations of scientists,	Male graduate student discussing research during a poster session
physicians, and other health care professionals.	Young man in suit pointing at results on poster as facult member listens

Research is a core part of LSU Health Shreveport's mission.	Exterior of B.R.I. and LSUHS medical school buildings
Faculty, staff, and students from all three schools are actively engaged in	Female in lab filling test plates
research across a variety of biomedical fields	Post doctoral fellow at microscope in lab
with a focus on cancer,	Man putting vial inside machine
cardiovascular sciences,	Girl using machine shave cell material
virology, and neuroscience.	Closeup of older females eyes looking through a microscope
On campus, new BSL two and BSL three labs	High exterior shot of LSUHS campus
opening in the center for Medical Education	Exterior at end of Center for Medical Education
provides new research, grant, and training opportunities.	Closeup of hands filling vial with blue liquid
Cancer and Cardiovascular Research will have a new home in 2027,	Female graduate student filling test tubes under vent hood
when the renovation of the former Sears building,	Exterior of Sears building loading dock
located less than half a mile from campus,	Interior of empty Sears building
is completed,	Artist's rendering of potential future design
providing expansive modern research labs.	Person working at a computer in research lab
This research brings in millions of dollars	Closeup of block of cells being shaved
in extramural funding,	Closeup of test plate being filled
contributing to the overall economic impact the institution brings to the Shreveport-Bossier region.	Ariel shot of downtown Shreveport Text: \$595 Million
The Schools of Medicine,	Medical Students working with a simulated torso practicing chest tube insertion
allied health	Physical therapy class in PT clinic instructor demonstrating walker technique
and graduate studies	Closeup of hands prepping a gel plate
make up our unique institution. But of course, people make the place	Group of student coming down stairs in Center for Medical Education camera pans to students studying in seating area
and the people working and training here at	Doctor demonstrates knot tying technique to a group of residents seated at a table
LSU Health Shreveport are aiming high	Faculty doctor walking in clinic hall surrounded by group of residents and students Graphic: Aiming High logo
in our mission to teach, heal and discover.	Graphic: Aiming High logo continues over Ariel shot of LSUHS Campus with LSU Health Shreveport logo Text: Teach. Heal. Discover.
