& DONORS

Interested Farm-to-School Education?

Join our AmeriCorps team as a Farm and Food Educator!

FARM, TEACH & COOK

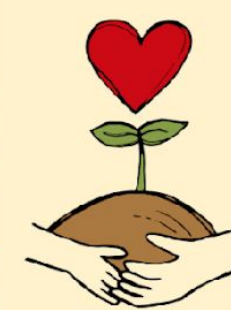

AmeriCorps members work closely with our farm team, using the growing season, science, and nutrition as the basis for daily curriculum to provide K-12 grade students with hands-on learning.

Members play an integral role in overseeing the operations of the school farm, engaging in diverse responsibilities, including soil preparation, planting, nurturing, and harvesting fruits and vegetables. They receive training in essential farm techniques such as crop planning, pest and weed management, soil enrichment, and resource management.
