

Naviance Student Overview

Naviance Student is an online tool ZCHS uses to do research on careers, explore colleges, and complete transcript requests for college applications. Naviance Student is used for post-secondary readiness and counselors engage in multiple activities with students throughout the year. Students may use Naviance Student to help make decisions as they make plans to transition from high school to adulthood. There are four main tabs we encourage student to frequent.

Colleges Tab – Allows students to research college options, super college match, personalize student college lists, request transcripts for college applications, sign up for college representative visits, and search for scholarships.

Careers Tab – Allows students to research careers through interest inventories, career searches, and Road Trip Nation videos.

About Me Tab – Students can build a resume that may be uploaded into college applications, access cumulative GPA, and update email and other profile information.

My Planner Tab – View grade level tasks assigned by counselors and create to-do lists to keep student on-track with college applications.
