

NOTICE TO PARENTS, TEACHERS, AND EMPLOYEES
OF THE WAYNE COUNTY BOARD OF EDUCATION

On October 22, 1986, the Asbestos Hazard Emergency Response Act (AHERA, Public Law 99-519) was signed into law. The law required EPA to develop regulations, which provide a comprehensive framework for addressing asbestos problems in public and private elementary and secondary schools. On October 30, 1987, EPA published the Asbestos-Containing Materials in Schools Rule [40 CFR Part 763 Subpart E]. This Rule requires all public and private elementary and secondary schools to inspect for friable and non-friable asbestos, develop asbestos management plans that address asbestos hazards in school buildings, and implement response actions in a timely fashion.

To carry out the above activities involving inspections, management plans, and response actions the Wayne County Board of Education has utilized accredited personnel. On April 30, 1987, EPA published the Model Accreditation Plan [40 CFR Part 763 Appendix C to Subpart E] required by AHERA, which specifies training, examination, and other requirements for persons who inspect, develop management plans and design or conduct response actions in schools. The Model Plan became effective on June 1, 1987.

The Wayne County Board of Education retained Barry W. Cooper, Inc., who completed the required AHERA Re-inspections to locate asbestos-containing building materials (ACBM) and developed and submitted to the State of Kentucky an Asbestos Management Plan update that includes the results of these re-inspections.

Copies of the management plan are always available for review for those interested persons at the Administration Office at 150 Cardinal Way, Monticello, KY and at the Front Office at each School any time during normal office hours.

Copies are available for duplication at a cost of 25 cents for each 8-1/2x11 page of the Management Plan.

Don Neal, Superintendent
Wayne County Board of Education

BELL ELEMENTARY
WAYNE COUNTY BOARD OF EDUCATION

NOTICE TO SCHOOL EMPLOYEES

In accordance with EPA regulations, the Bell Elementary School Building has been inspected for friable (easily crumbled) as well as non-friable (not easily crumbled) building materials which contain asbestos. Asbestos-containing materials are known to cause health problems when fibers are breathed or ingested.

A record of the Management Plan, a diagram of the locations of friable and non-friable asbestos-containing materials and a copy of relevant EPA regulations are available in the Principal's Office for review by any employee of the Wayne County Board of Education.

For further information, interested persons should contact the Wayne County Board of Education's EPA designated person Ronnie Hancock or Don Neal, Superintendent.
