USER ID: student ID number

PASSWORD: two images selected by the student

Students will select their **two pictures** that they selected at school with their teacher.

Then select **Continue**.

Note: The student's chosen pictures might appear in various positions whenever they log in because the pictures are shuffled each time.

If the student chooses the wrong pictures, they will see a message at the top saying "Incorrect selection..." and will need to try again. It will automatically clear out the student's previous choices and the student can select their pictures again. After 5 incorrect attempts, the student will be locked out of their account for 15 minutes.
