Executive Summary

Overview

This report summarizes the Kindergarten Readiness Assessment Revised (KRA-R), which measures academic readiness and literacy skills as well as Social Foundations (socio-emotional development), Mathematics, Physical Well-Being, and Motor Development. The KRA-R is administered to Kindergarten students attending schools in the State of Ohio, including students within the Cincinnati Public Schools (CPS) district, beginning as early as July 1 and ending no later than the twentieth day of instruction during the academic year. The data included in this report for the 2024-25 academic year were provided by CPS to INNOVATIONS in Community Research and Program Evaluation of Cincinnati Children’s Hospital Medical Center in partnership for analysis and reporting. This report focuses on the KRA-R composite score (overall Kindergarten Readiness score) and the Language and Literacy subtest score. The composite scaled score (overall score) on the KRA-R is determined by a student’s set of skills and behaviors across four subtests. The KRA-R measures readiness through performance levels: Emerging Readiness (Scores of 0-257), Approaching Readiness (Scores of 258-269), and Demonstrating Readiness (Scores at or above 270). A scaled score of 263 and above on the Language and Literacy subtest indicates that a student is “On Track” for Kindergarten.

Summary of 2024-25 KRA-R Results

A total of 2,398 CPS Kindergarten students completed KRA-R assessments during the 2024-25 academic year. Students achieved a mean overall scaled score of 261.7 (SD = 16.2), with 29.1% demonstrating readiness. On the Language and Literacy subtest, students had an average score of 259.7 (SD = 19.5) and 39.7% were On Track for language and literacy.

Demographics

Of the 2024-25 CPS Kindergarten cohort, 51.5% were female and 48.5% were male. The racial breakdown was 58.1% Black/African American, 20.4% White, 12.4% Hispanic, 7.7% Multi-racial, and 1.5% Other/Unknown, and 47.2% of students had Documented CPS Preschool experience.

Socioeconomic Status

The socioeconomic status (SES) quartile metric is used as a proxy for income and social factors. SES characteristics for census tracts were estimated using methodology detailed in The Social Areas of Cincinnati (5th Ed.; Maloney & Auffrey, 2013). Cincinnati and surrounding metropolitan area census tract statistics were extracted from the 2021 American Community Survey (ACS) - 5 Year Estimates. Five SES indicators were used to rank census tracts by socioeconomic risk: (1) median household income; (2) percent of population 25 years of age or older with less education than a high school diploma; (3) percent of workers in unskilled and semiskilled occupations; (4) percent of children (under the age of 18) living in married-couple, family households; and (5) percent of housing units with more than one person per room.

Ranked census tracts were divided into quartiles (SES 1-4), where lower SES quartiles have a higher concentration of families with socioeconomic risk factors. CPS kindergartners within SES 1 neighborhoods made up 36.9% of the 2024-25 class, while 25.8% were SES 2, 20.8% were SES 3, and 16.6% were SES 4.

KRA-R Performance by Preschool Experience

Among CPS students with Documented CPS Preschool experience, 29.8% were demonstrating readiness on the overall assessment compared to 28.4% of students with all other experiences (i.e., students for whom Documented CPS Preschool enrollment was not available). In addition, 42.6% of students who had CPS preschool were On Track as opposed to 37.1% of those with all other experiences.

Note. All Other Experiences refer to students enrolled in Kindergarten within the CPS district, but with no Documented CPS Preschool experience. These students may or may not have attended preschool outside of the CPS district before enrolling in Kindergarten.

KRA-R Performance by SES

SES quartiles allow for the examination of KRA-R performance in the context of social factors. Students who live in lower SES neighborhoods tend to score lower than their higher SES counterparts. In 2024-25, 54.5% of SES 4 students were demonstrating readiness compared to 34.1% of SES 3, 25.2% of SES 2, and 17.4% of SES 1 students. Likewise, 67.3% of SES 4, 46.6% of SES 3, 34.6% of SES 2, and 26.9% of SES 1 were On Track.

Data analysis further examined socioeconomic status in the context of various demographics and conditions to better understand its impact in conjunction with other relevant factors that affect Kindergarten Readiness. In particular, KRA-R performance and SES were examined in relation to student race and documented CPS Preschool experience. See the full report for more details.

Summary and Next Steps

The report yielded a number of findings and opportunities for next steps.

- **Kindergarten Readiness Underscored by Quality Preschool:** Data show that children who are enrolled in CPS/quality preschool are demonstrating higher overall readiness and Language and Literacy, as measured by the KRA-R. Literature shows that children in quality preschool benefit cognitively, socially and emotionally. Encouraging parents and caregivers to enroll children in quality preschool and other enrichment programs prior to kindergarten enrollment remains a priority for the district and broader community. Findings also show that factors such as race, ethnicity, neighborhood, and socioeconomic status influence kindergarten readiness, as well as language and literacy.
- **Importance of Identifying and Addressing Students' Needs:** Kindergarten students have unique needs that may require targeted and individualized instruction. For example, some students are

demonstrating readiness (29.1%) and are showing high literacy levels. Other students are approaching readiness (32.7%) and will need support. Students will need individualized instruction, specific to their needs, with the goal that each student reaches their potential.

- **Positive Trends Continuing, but Additional Strategies are Still Needed to Support Learning:** Overall Kindergarten Readiness and Literacy and Language trends are continuing to stabilize and increase post-COVID, perhaps due to consistent enrollment and attendance in preschool. Even still, students not On Track for literacy and kindergarten readiness will need positive educational and social supports.
- **Future Directions: Potential to Understand Social-Emotional Wellbeing, Educational Outcomes, and Long-Term Success:** There is a unique potential to go beyond preschool enrollment and kindergarten readiness outcomes to better understand social and emotional outcomes and long-term success in students.
- **CPS Shines Among Districts in Ohio but May Learn from National Best Practices:** Comparative data and benchmarking showed that CPS outperforms comparable districts in Ohio on KRA-R outcomes. In achieving best practice standards, CPS has an opportunity to learn from other model schools nationally as a next step.

Overview

This report summarizes Kindergarten Readiness Assessment Revised (KRA-R) results for Cincinnati Public Schools (CPS) Kindergarten students during the 2024-25 academic year. The KRA-R was administered to CPS kindergartners for the first time in 2021-22. The new assessment is intended to provide a more comprehensive view of a student's Kindergarten readiness and is designed to provide a snapshot of Kindergarten readiness levels, thereby making it possible to confidently determine if entering students have the skills and behaviors needed to succeed in Kindergarten.

CPS administered the Kindergarten Readiness Assessment – Literacy (KRA-L) to assess the literacy skills and academic readiness of children enrolled in Kindergarten from 2004-05 to 2012-13. The KRA-L was replaced in 2014-15 with the Kindergarten Readiness Assessment (KRA), which assesses academic readiness and literacy skills along with skills of Social Foundations (socio-emotional development), Mathematics, Physical Well-Being, and Motor Development. In 2020-21, the KRA-R was scheduled to be administered to CPS Kindergartners. However, due to the COVID-19 pandemic, the district administered the Acadience Reading K-6 (formerly DIBELS) assessment in its stead and the administration of the KRA-R was postponed until 2021-22.

It is important to note that 2020-21 and 2021-22 were unique academic years due to the COVID-19 pandemic. For the Cincinnati Public Schools (CPS) district, traditional (in-person) instruction ended in March of the 2019-20 school year and did not resume in-person or virtual learning five days per week until March of the 2020-21 school year. Access to instructional materials, technological devices, and the internet was limited for many children and students of all ages during these transitional periods. Staff shortages and school absences due to illness in preschool classrooms through high school interrupted the learning process for students. For many students, parents, staff, and members of the broader community, life and routines were disrupted and changed and, in many cases, permanently. Thus, COVID-19 is an important consideration for how educators and stakeholders support overall early literacy, school readiness, and long-term academic success for students attending CPS schools today and in the future.

Trained teachers administer the Kindergarten Readiness Assessment Revised (KRA-R) using observation, response questions, and performance tasks that require an action or verbal response. Students are assessed beginning as early as July 1 and ending no later than the twentieth day of instruction during the academic year. Cincinnati Public Schools provided KRA-R data to INNOVATIONS in Community Research and Program Evaluation of Cincinnati Children's Hospital Medical Center for analysis and reporting. The data presented in this report were analyzed from within the contexts of demographics, early learning considerations, school, and home zip code.

The KRA-R uses a combination of direct assessment, observation, and performance task methods. The results are based on scaled scores and should be interpreted according to peer performance. For the purpose of this report, results are entirely focused on the KRA-R composite score and the Language and

Literacy subtest. The composite scaled score (hereafter referred to in this report as the “overall score”) on the KRA-R is determined by a student’s set of skills and behaviors across four learning domains (i.e., Language and Literacy, Social Foundations, Mathematics, and Physical Well-Being and Motor Development). The KRA-R measures readiness through performance levels based on overall scaled scores. Each performance level guides decisions about further assessment and instruction for both individuals and groups of students. In order for a student to “demonstrate readiness” on the overall assessment – the highest performance level – they must demonstrate these foundational skills and behaviors for all four domains; otherwise, a student will achieve an overall score of approaching or emerging readiness. Students with scores that approach readiness or are considered emerging have not yet demonstrated the foundational skills and behaviors that prepare them for curriculum based on Kindergarten standards set in the State of Ohio. An overview of the performance levels can be seen below:

- **Emerging Readiness (Scores of 0-257):** Scores that fall within “Emerging Readiness” indicate that a student displays minimal foundational skills and behaviors that prepare him/her for curriculum based on Kindergarten standards in the State of Ohio.
- **Approaching Readiness (Scores of 258-269):** Scores that fall within “Approaching Readiness” indicate that a student exhibits some of the foundational skills and behaviors that prepare him/her for curriculum based on Kindergarten standards in the State of Ohio.
- **Demonstrating Readiness (Scores of 270+):** Scores that fall within “Demonstrating Readiness” indicate that a student exhibits the foundational skills and behaviors that prepare him/her for curriculum based on Kindergarten standards in the State of Ohio.

The Ohio Department of Education and Workforce (DEW) has retained the language of “On Track” status for the KRA-R Language and Literacy subtest. A scaled score of 263 and above on the subtest indicates that a student is On Track for proficiency in reading.

Summary of 2024-25 KRA-R Results

A total of 2,398 CPS Kindergarten students completed the KRA-R in the 2024-25 academic year. Assessments were not included in the analyses if they were incomplete, or tests taken by students repeating Kindergarten. If a student completed more than one assessment in the same year, the highest score was selected. The analysis of KRA-R performance provides a unique opportunity to understand the relationship among demographic, contextual/school factors, preschool history experiences, and Kindergarten Readiness status. Although data were available for subtests Social Foundations, Mathematics, and Physical Well-Being and Motor Development, only results on the overall assessment and Language and Literacy subtest have been included in this report.

In 2024-25, students achieved a mean overall scaled score of 261.7 (SD = 16.2), with 29.1% demonstrating readiness. On the Language and Literacy subtest, students had an average score of 259.7 (SD = 19.5) and 39.7% were On Track for Kindergarten (Figure 1). Since 2023-24, the percentage of students demonstrating readiness increased by 0.4 percentage points and the percentage of students On Track increased by 0.2 percentage points (Appendix, Table I).

Demographics

The demographic characteristics of the 2024-25 cohort are shown in Figure 2. The distribution of gender was 48.5% male and 51.5% female. The racial breakdown for the cohort was 58.1% Black/African American, 20.4% White, 12.4% Hispanic, 7.7% Multi-Racial, and 1.5% other or unknown races. Among students that completed assessments, 47.2% had Documented CPS Preschool experience prior to Kindergarten. Preschool dosage data indicated that 21.9% of the cohort had 1 year of CPS preschool and 25.3% had two years.

Figure 2. Demographics of Cincinnati Public KRA-R Cohort in 2024-25

Note. All Other Experiences refer to students enrolled in Kindergarten within the CPS district, but with no Documented CPS Preschool experience. These students may or may not have attended preschool outside of the CPS district before enrolling in Kindergarten.

Socioeconomic Status Overview

The socioeconomic status (SES) quartile metric is used as a proxy for income and social factors. SES characteristics for census tracts were estimated using methodology detailed in *The Social Areas of Cincinnati* (5th Ed.; Maloney & Auffrey, 2013). Cincinnati and surrounding metropolitan area census tract statistics were extracted from the 2021 American Community Survey (ACS) - 5 Year Estimates. Five SES indicators were used to rank census tracts by relative socioeconomic risk:

1. Median household income
2. Percent of population 25 years of age or older with less education than a high school diploma
3. Percent of workers in unskilled and semiskilled occupations
4. Percent of children (under the age of 18) living in married-couple, family households
5. Percent of housing units with more than one person per room

The five SES indicators were condensed into a single component score using principal component analysis. Census tracts were ranked using the component score and divided into quartiles (SES 1-4), where lower SES tracts have a higher concentration of families with socioeconomic risk factors. Student residential addresses were geocoded using ESRI's ArcGIS Pro software to determine their census tract, which was then used to determine which socioeconomic status (SES) quartile the individual students fall within.

The overall distribution of SES for the 2024-25 KRA-R cohort can be seen in Figure 3. An additional breakdown by race is illustrated in Figure 4. It is important to distinguish that the SES does not necessarily represent the individual socioeconomic characteristics of a student, but rather the average characteristics of families living within their neighborhood of residence.

KRA-R Performance by Preschool Experience

Outcomes for the KRA-R were compared between students who attended a CPS preschool prior to Kindergarten and those with all other experiences. All other experiences refer to students for whom documented CPS Preschool enrollment was not available. These students may have attended preschool outside of the CPS district or did not attend preschool before enrolling in Kindergarten. In 2024-25, CPS preschool students demonstrated readiness at a frequency of 29.8% compared to 28.4% of students with all other experiences (Figure 5). Additionally, Kindergarteners with documented CPS Preschool experience were On Track for literacy at a rate of 42.6% compared to 37.1% of students with all other experiences (Figure 6).¹

¹ Mean scaled scores for CPS preschool students were non-significant compared to those with all other experiences for Overall KRA-R, $F(1,2396) = 0.49$, $p = .483$, but significantly greater than those with all other experiences for Language and Literacy, $F(1,2396) = 7.89$, $p = .005$, $\eta^2 = .003$.

Figure 5. KRA-R Performance Levels by Preschool Experience (2024-25)

Figure 6. Percent On Track in KRA-R Literacy by Preschool Experience (2024-25)

The impact of CPS preschool dosage is presented in Figures 7-8. Overall, (34.8%) of students with 2 years of CPS preschool, compared to (24.0%) of students with 1 year of CPS preschool, and (28.4%) of students with all other experiences (Figure 7).² Comparisons for Language and Literacy subtest results indicated that (47.8%) of 2-year students, (36.6%) of 1-year students, and (37.1%) of those with all other experiences were On Track for literacy (Figure 8).³ Additional KRA-R statistics by preschool experience and dosage are available in Appendix, Table IV.

Figure 7. KRA-R Performance Levels by Preschool Dosage (2024-25)

Figure 8. Percent On Track in KRA-R Literacy by Preschool Dosage (2024-25)

Note. All Other Experiences refer to students enrolled in Kindergarten within the CPS district, but with no Documented CPS Preschool experience. These students may or may not have attended preschool outside of the CPS district before enrolling in Kindergarten.

² Statistically significant difference in mean Overall KRA-R scaled scores by preschool dosage: $F(2,2395) = 4.55$, $p = .011$, $\eta^2 = .004$ [Post hoc comparisons using Tukey HSD test: 2 Years vs. All Other Experiences ($p = .067$), 2 Years vs. 1 Year ($p = .009$), 1 Year vs. All Other Experiences ($p = 0.422$)].

³ Statistically significant difference in mean Language and Literacy scaled scores by preschool dosage: $F(2,2395) = 10.48$, $p < .001$, $\eta^2 = .009$ [Post hoc comparisons using Tukey HSD test: 2 Years vs. All Other Experiences ($p < .001$), 2 Years vs. 1 Year ($p = .001$), 1 Year vs. All Other Experiences ($p = 1.000$)].

KRA Performance by SES

SES data allow us to examine KRA-R performance through the lens of neighborhood risk factors. As is evident in Figures 9 and 10, CPS students who live in neighborhoods with higher concentrations of SES risk factors (SES 1 and 2) scored lower than their higher SES (3 and 4) counterparts.⁴ This presents direct academic consequences for households that contain these risk factors as well as possible consequences for other families within the same community that are indirectly impacted by concentrated poverty. Additional KRA-R statistics by SES are available in Appendix, Table V.

Figure 9. KRA-R Performance Levels by SES (2024-25)

Figure 10. Percent On Track in KRA-R Literacy by SES (2024-25)

SES Analysis

Socioeconomic status was examined in the context of various demographics and conditions to better understand its impact in conjunction with other relevant factors that affect Kindergarten Readiness. KRA-R performance and SES were examined in relation to student race and documented CPS Preschool experience.⁵

⁴ Statistically significant difference in mean Overall KRA-R scaled scores by SES, $F(3,2394) = 75.34$, $p < .001$, $\eta^2 = .086$, and in mean Language and Literacy scaled scores by SES: $F(3,2394) = 80.43$, $p < .001$, $\eta^2 = .092$ [Post hoc comparisons using Tukey HSD test were all statistically significant for Overall and Language and Literacy mean scores ($p < .05$).

⁵ Three-way full factorial ANOVA model (SES, preschool experience, race) for overall scaled scores: $F(39, 2358) = 14.51$, $p < .001$, $\eta^2 = .194$; and Language and Literacy scaled scores: $F(39, 2358) = 17.09$, $p < .001$, $\eta^2 = .220$.

KRA-R Performance by SES and Preschool Experience

Figures 11-12 show that performance differed within SES between students with documented CPS Preschool experience and students with All Other Experiences.⁶ This relationship is most pronounced among low SES students (SES 1-2). For example, SES 1 students with CPS Preschool experience demonstrated readiness at a rate of 19.8% and were On Track for literacy at a rate of 32.0%. In comparison, 15.0% of SES 1 students with All Other Experiences demonstrated readiness and 21.7% were On Track. Mean scores by preschool experience and SES can be viewed in the Appendix, Table VI.

Figure 11. KRA-R Performance Levels by Preschool Experience and SES (2024-25)

Figure 12. Percent On Track in KRA-R Literacy by Preschool Experience and SES (2024-25)

Note. All Other Experiences refer to students enrolled in Kindergarten within the CPS district, but with no Documented CPS Preschool experience. These students may or may not have attended preschool outside of the CPS district before enrolling in Kindergarten.

⁶ Non-significant SES by preschool experience interactions for mean Overall KRA-R scaled score, $F(3, 2358) = 0.96$, $p = .410$, and mean Language and Literacy scaled scores: $F(3, 2358) = 1.51$, $p = .210$.

KRA-R Performance by SES and Race

KRA-R performance varied by SES within each race, though to varying degrees (Figures 13-14).⁷ Whereas the analyses show higher KRA-performance outcomes for some living in high SES neighborhoods (e.g., White students), this trend is not observed for all students (e.g., Black/African American and Hispanic students). The figures below do not include CPS students with a race of Other/Unknown due to small sample sizes. For more information, including average scores by race and SES please review Appendix, Table VII.

Figure 13. KRA-R Performance Levels by Race and SES (2024-25)

Note. Results omitted if N<10.

⁷ Statistically significant SES by race interactions for mean Overall KRA-R scaled scores, $F(12, 2358) = 5.55, p < .001, \eta_p^2 = .027$, and mean Language and Literacy scaled scores: $F(12, 2358) = 4.70, p < .001, \eta_p^2 = .023$.

Figure 14. Percent On Track in KRA-R Literacy by Race and SES (2024-25)

Note. Results omitted if $N < 10$.

KRA-R Performance by SES, Race, and Preschool Experience

Given the relationship that race, preschool experience, and SES share with KRA-R performance, analysts factored all combinations to determine how they interact. Figures 15-16 present KRA-R outcomes by SES within the context of both race and documented CPS Preschool experience.⁸ Low SES students (SES 1-2) that attend CPS Preschool before kindergarten tend to perform better than low SES students with All Other Experiences. Furthermore, CPS Preschool experience shows variable degrees of impact depending on the combination of race and SES. For example, SES 1 Black/African American students demonstrated readiness at a rate of 21.4% for those with CPS Preschool experience and 18.1% for those with All Other Experiences.

⁸ Non-significant three-way interactions between SES, race, and preschool experience for mean Overall KRA-R scaled scores, $F(16, 2358) = 1.32$, $p = .177$, and mean Language and Literacy scaled scores: $F(16, 2358) = 1.27$, $p = .205$.

In contrast, SES 1 Hispanic students demonstrated readiness at a rate of 11.8% for those with documented CPS Preschool experience and 1.9% for those with All Other Experiences.

Note that data were omitted if the sample was below 10 students, or if the student had a race of Other/Unknown. For more information regarding this analysis, review Appendix, Table VIII.

Figure 15. KRA-R Performance Levels by SES, Race, and Preschool Experience (2024-25)

Note. Results omitted if N<10.

Figure 16. Percent On Track in KRA-R Literacy by SES, Race, and Preschool Experience (2024-25)

Note. Results omitted if N<10.

Additional KRA-R Findings

Ohio School District Comparisons

Cincinnati Public Schools is the second largest public school district in the state of Ohio. To evaluate the district's performance, the 2024-25 KRA-R results for CPS were compared to five other large, demographically similar school districts in Ohio: Columbus City, Cleveland Municipal, Akron City, Toledo City, and Dayton City. Results from last year's (2023-24) Annual KRA-R report for CPS are also included for additional context. The results for these five districts portrayed in Figures 17 and 18 were retrieved from the 2023-24 Ohio School Report Cards from the Ohio Department of Education and Workforce (DEW). Note that 2024-25 report cards have not been released by DEW at the time of this analysis, so caution is advised when interpreting the following district comparisons.

Figures 17-18 indicate that KRA-R performance at CPS (in 2024-25) is higher than those of comparable districts within Ohio (in 2023-24). CPS kindergarteners of 2024-25 demonstrated readiness on the KRA-R more often than four of the five other school districts at differences ranging from 9.2 to 14.2 percentage points, but 1.9 percentage points fewer than Columbus City Schools. In addition, CPS kindergarteners of 2024-25 were more often On Track on the Language and Literacy subtest than those of all five of the other districts by differences ranging from 0.5 to 17.0 percentage points. KRA-R performance has declined across Ohio since the onset of COVID-19, but Cincinnati Public Schools exhibits readiness comparable to or greater than that of similar districts.

Figure 17. KRA-R Performance Levels by Ohio School District

Figure 18. Percent On Track in KRA-R Literacy by Ohio School District

Note. Cincinnati Public Schools KRA-R results compared to Ohio school districts of similar size and demographic makeup.

* Results from CPS Kindergarten data shared with INNOVATIONS for the 2023-24 Annual Kindergarten Readiness Assessment Revised (KRA-R) Report.

** 2023-24 KRA-R results retrieved from Ohio Department of Education and Workforce (DEW) <https://reportcard.education.ohio.gov>.

KRA-R Performance by School

KRA-R data were also analyzed to highlight performance trends across Kindergarten buildings. Overall KRA-R and Language and Literacy scores, as well as On Track and performance levels (Appendix, Table IX) varied across schools. Factors that may help to explain the differences could include: (1) feeder preschool data; (2) support services and partnerships within the schools; (3) parent support and involvement; and (4) family and neighborhood demographics.

KRA-R Performance by Zip Code

Neighborhood factors, social supports, and access to resources may also predict student achievement. Therefore, analyses were conducted to summarize students' performance on the KRA-R according to their residential zip codes (Appendix, Table X). Zip codes with small sample sizes ($N < 10$) were not included.

Distribution of SES by School

Further context is provided in Appendix, Table XI which displays the proportion of the attending students within each of the SES quartiles.

Summary and Next Steps

KRA Report Summary

This report summarizes KRA-R results for CPS Kindergarten students during the 2024-25 academic year. The analysis yields several important findings about academic readiness in Kindergarten students and its relationship to preschool experience and demographic factors.

- **District KRA-R Performance:** During 2024-25, a total of 38.3% of students showed emerging readiness (scores of 257 and below), while 32.7% were approaching readiness (scores of 258-269), and 29.1% were demonstrating readiness (scores of 270 and above; see Figure 1). On the Language and Literacy subtest, 39.7% of students were considered “On Track” for literacy (scores of 263 and above).
- **KRA-R Performance by Preschool Experience:** A total of 29.8% of students who had Documented CPS Preschool were demonstrating readiness as opposed to 28.4% of those with All Other Experiences (i.e., students for whom Documented CPS Preschool enrollment was not available; see Figure 5). Additionally, 42.6% of students with Documented CPS Preschool were On Track compared to 37.1% of those with All Other Experiences (see Figure 6). An analysis of preschool dosage showed that 34.8% of 2024-25 Kindergarten students with two years of Documented CPS Preschool were On

Track compared to 24.0% of those with one year (see Figure 7), and 47.8% of two-year students were On Track compared to 36.6% of one-year students (see Figure 8).

- **KRA-R Performance by Socioeconomic Status:** Lower SES students tend to score lower than their higher SES counterparts. In 2024-25, 54.5% of SES 4 students were demonstrating readiness compared to 34.1% of SES 3, 25.2% of SES 2, and 17.4% of SES 1 students (see Figure 9). Likewise, 67.3% of SES 4, 46.6% of SES 3, 34.6% of SES 2, and 26.9% of SES 1 were On Track (see Figure 10).
- **KRA-R Performance by SES and Preschool Experience:** KRA-R performance differed within SES between students with documented CPS Preschool experience and students with All Other Experiences. This relationship is most pronounced among low SES students (SES 1-2). Among students with documented CPS Preschool experience, 50.0% of SES 4, 39.0% of SES 3, 27.2% of SES 2, and 19.8% of SES 1 demonstrated readiness (Figure 11). Among students with All Other Experiences, 57.1% of SES 4, 29.4% of SES 3, 23.5% of SES 2, and 15.0% of SES 1 demonstrated readiness. Additional data are available in Figure 12 and Appendix, Table VI.
- **KRA-R Performance by SES and Race:** KRA-R outcomes vary by race (accounting for SES) to differing degrees (see Figures 13-14). Whereas some groups show distinct benefits from living in high SES neighborhoods (e.g., White students), KRA-R outcomes for other groups differ to a lesser extent between SES quartiles (e.g., Black/African American and Hispanic students). Additional data are available in Appendix, Table VII.
- **KRA-R Performance by SES, Race, and Preschool Experience:** An analysis was conducted factoring in all combinations of SES, race, and preschool experience to determine how they interact. The analysis indicated that those with Documented CPS Preschool experience outperformed those without, most notably in SES 1-2. This effect was identified across most races, but to differing magnitudes. See Figures 15-16 and Appendix, Table VIII for further details.
- **Ohio School District Comparisons:** CPS is the second largest public school district in the state of Ohio. The CPS district's performance on the KRA-R in 2024-25 were compared to 2023-24 Ohio School Report Cards for five other large, demographically similar school districts in Ohio (Columbus City, Cleveland Municipal, Akron City, Toledo City, and Dayton City). CPS kindergarteners demonstrated readiness on the KRA-R more often than four of the five other school districts at differences ranging from 9.2 to 14.2 percentage points, but 1.9 percentage points fewer than Columbus City Schools. CPS was more frequently On Track in Language and literacy than all five districts by differences ranging from 0.5 to 17.0 percentage points.
- **Additional KRA-R Findings:** School and Zip Code data indicated that there was variability across schools and neighborhoods with respect to performance on overall readiness and Language and Literacy. Performance trends may vary by preschool experience, socioeconomic, and other

demographic and neighborhood factors (see Appendix, Tables IX-X). Appendix, Table XI provides further context by displaying the proportion of the attending students within each SES.

Next Steps

The report yielded a number of findings and opportunities for next steps.

- **Kindergarten Readiness Underscored by Quality Preschool:** Data show that children who are enrolled in CPS/quality preschool are demonstrating higher overall readiness and Language and Literacy, as measured by the KRA-R. Literature shows that children in quality preschool benefit cognitively, socially and emotionally. Encouraging parents and caregivers to enroll children in quality preschool and other enrichment programs prior to kindergarten enrollment remains a priority for the district and broader community. Findings also show that factors such as race, ethnicity, neighborhood, and socioeconomic status influence kindergarten readiness, as well as language and literacy.
- **Importance of Identifying and Addressing Students' Needs:** Kindergarten students have unique needs that may require targeted and individualized instruction. For example, some students are demonstrating readiness (29.1%) and are showing high literacy levels. Other students are approaching readiness (32.7%) and will need support. Students will need individualized instruction, specific to their needs, with the goal that each student reaches their potential.
- **Positive Trends Continuing, but Additional Strategies are Still Needed to Support Learning:** Overall Kindergarten Readiness and Literacy and Language trends are continuing to stabilize and increase post-COVID, perhaps due to consistent enrollment and attendance in preschool. Even still, students not On Track for literacy and kindergarten readiness will need positive educational and social supports.
- **Future Directions: Potential to Understand Social-Emotional Wellbeing, Educational Outcomes, and Long-Term Success:** There is a unique potential to go beyond preschool enrollment and kindergarten readiness outcomes to better understand social and emotional outcomes and long-term success in students.
- **CPS Shines Among Districts in Ohio but May Learn from National Best Practices:** Comparative data and benchmarking showed that CPS outperforms comparable districts in Ohio on KRA-R outcomes. In achieving best practice standards, CPS has an opportunity to learn from other model schools nationally as a next step.

	SES 4	357	270.1	15.8	20.2%	28.0%	51.8%	270.0	18.7	63.9%

Note. Socioeconomic status (SES) characteristics of CPS student families were estimated via the Census Tract they resided in using a methodology illustrated in The Social Areas of Cincinnati (5th Ed.; Maloney & Auffrey, 2013). An SES component score was calculated from five SES indicators from the American Community Survey (ACS) - 5 Year Estimates for 2021. Student residential addresses were geocoded to determine their census tract, which was then used to determine which SES quartile the individual students fall into. SES quartiles operate as a proxy for income and other social factors. They rank from 1 to 4, where lower ranked neighborhoods have a larger concentration of families with socioeconomic risk factors.

Table VI: KRA-R Scores by SES and CPS Preschool Experience

Note. Results omitted if N<10. Socioeconomic status (SES) characteristics of CPS student families were estimated via the Census Tract they resided in using a methodology illustrated in The Social Areas of Cincinnati (5th Ed.; Maloney & Auffrey, 2013). An SES component score was calculated from five SES indicators from the American Community Survey (ACS) - 5 Year Estimates for 2021. Student residential addresses were geocoded to determine their census tract, which was then used to determine which SES quartile the individual students fall into. SES quartiles operate as a proxy for income and other social factors. They rank from 1 to 4, where lower ranked neighborhoods have a larger concentration of families with socioeconomic risk factors.

*Students with "All Other Experiences" refer to students enrolled in Kindergarten within the CPS district, but with no Documented CPS Preschool experience. These students may or may not have attended preschool outside of the CPS district before enrolling in Kindergarten.

Note. Results omitted if N<10. Socioeconomic status (SES) characteristics of CPS student families were estimated via the Census Tract they resided in using a methodology illustrated in *The Social Areas of Cincinnati* (5th Ed.; Maloney & Auffrey, 2013). An SES component score was calculated from five SES indicators from the American Community Survey (ACS) - 5 Year Estimates for 2021. Student residential addresses were geocoded to determine their census tract, which was then used to determine which SES quartile the individual students fall into. SES quartiles operate as a proxy for income and other social factors. They rank from 1 to 4, where lower ranked neighborhoods have a larger concentration of families with socioeconomic risk factors.

Note. Results omitted if N<10. Socioeconomic status (SES) characteristics of CPS student families were estimated via the Census Tract they resided in using a methodology illustrated in The Social Areas of Cincinnati (5th Ed.; Maloney & Auffrey, 2013). An SES component score was calculated from five SES indicators from the American Community Survey (ACS) - 5 Year Estimates for 2021. Student residential addresses were geocoded to determine their census tract, which was then used to determine which SES quartile the individual students fall into. SES quartiles operate as a proxy for income and other social factors. They rank from 1 to 4, where lower ranked neighborhoods have a larger concentration of families with socioeconomic risk factors.

*Students with "All Other Experiences" refer to students enrolled in Kindergarten within the CPS district, but with no Documented CPS Preschool experience. These students may or may not have attended preschool outside of the CPS district before enrolling in Kindergarten.

Table XI (continued). SES Quartiles by CPS Kindergarten

School Name	School Year	Students Assessed	SES Quartile			
			SES 1	SES 2	SES 3	SES 4
South Avondale Elementary School	2024-25	47	85.1%	6.4%	6.4%	2.1%
	2023-24	35	74.3%	5.7%	5.7%	14.3%
	2022-23	29	75.9%	13.8%	0.0%	10.3%
	2021-22	33	60.6%	36.4%	0.0%	3.0%
Westwood Elementary School	2024-25	50	72.0%	6.0%	10.0%	12.0%
	2023-24	51	62.7%	7.8%	17.6%	11.8%
	2022-23	44	68.2%	9.1%	20.5%	2.3%
	2021-22	39	59.0%	7.7%	33.3%	0.0%
William H Taft Elementary School	2024-25	23	34.8%	43.5%	17.4%	4.3%
	2023-24	24	20.8%	62.5%	8.3%	8.3%
	2022-23	27	33.3%	48.1%	18.5%	0.0%
	2021-22	23	43.5%	30.4%	4.3%	21.7%
Winton Hills Academy Elementary School	2024-25	42	97.6%	2.4%	0.0%	0.0%
	2023-24	35	100.0%	0.0%	0.0%	0.0%
	2022-23	46	97.8%	0.0%	2.2%	0.0%
	2021-22	34	91.2%	2.9%	2.9%	2.9%
Woodford Paideia Elementary School	2024-25	35	11.4%	17.1%	62.9%	8.6%
	2023-24	44	34.1%	11.4%	36.4%	18.2%
	2022-23	33	24.2%	33.3%	27.3%	15.2%
	2021-22	35	31.4%	37.1%	25.7%	5.7%

Note. Results omitted if N<10. Socioeconomic status (SES) characteristics of CPS student families were estimated via the Census Tract they resided in using a methodology illustrated in The Social Areas of Cincinnati (5th Ed.; Maloney & Auffrey, 2013). An SES component score was calculated from five SES indicators from the American Community Survey (ACS) - 5 Year Estimates for 2021. Student residential addresses were geocoded to determine their census tract, which was then used to determine which SES quartile the individual students fall into. SES quartiles operate as a proxy for income and other social factors. They rank from 1 to 4, where lower ranked neighborhoods have a larger concentration of families with socioeconomic risk factors.
