10 Minute Break

Today's Focus:

- The focus for this meeting will be on 9.2: **Enhance the resiliency of the District towards future environmental impacts**

How we are measuring progress:

1. The District considers sustainable design, development, and construction of new, remodeled, or upgraded school or central resource spaces.
2. The District considers the use of native or resilient plantings on District property.
3. The District has a written plan that assesses the potential environmental threats which may adversely impact the District's ability to maintain continuous operations.
4. The District will establish partnerships to support students and families disproportionately impacted by adverse climate change episodic events.

What should
we be
focusing on?

Split into 4 groups

Spend 5 minutes on each prompt
(current and future work)

Rotate

Group discussion

Prompt Discussion:

Anything that
really stood
out to you?

Any take
aways?

Group Discussion:

Additional topics
you want to
discuss?

How can we make
this time the most
impactful for you?

What changes
would you like to
see to these
meetings?

Closing:

NEXT MEETING: APRIL
24, 2025
