

Cardiac Emergency Response Plan (CERP) JS Morton West High School District 201

Follow these steps in responding to a victim who suddenly collapses, appears to have no pulse, does not appear to be breathing normally and/or appears to be unconscious.

1. Communication:

- Teacher/staff will press the emergency button in the classroom to alert security of cardiac emergency.
- Notify security answering emergency phone that there is a cardiac emergency, with the location.
- Nurses will receive a phone call and radio call from security relaying there is a cardiac emergency.
- Security at front desk will call a Code AED and will give the location of the cardiac emergency on the radio.

2. Scene safety:

- Move students in the immediate area away from the victim.

3. CPR:

- If staff member is CPR certified and can recognize the victim does not have a pulse and does not appear to be breathing- begin CPR.
- If no one is present that is CPR certified then the nearest person can perform hands only CPR by pushing hard and fast on the center of the chest.
- Goal is 100 compressions per minute.

4. If more than one staff member is on the scene:

- Direct person to retrieve the AED.
- Leave door open on the AED box, alarm will be audible and will alert team of the location.
- Press the power on button, attach the pads to the victim, shown on the diagram on the pads. Follow the AED's visual and audible prompts.
- If shock is needed, the AED will advise and deliver one or more shocks.
- Continue CPR.

5. Security, administration, resource officer, nurses and cardiac emergency team will arrive at the location of the cardiac emergency.
6. School resource officer will be notified by nurses to call 911 and will have security meet the paramedics and escort them to the victim.
7. Nurses will take over medical care and CPR. Nurse will attach AED (if AED has not been attached). Paramedics will assist with CPR and initiate transportation to hospital.
8. Administration prints victim's demographic information for paramedics and contacts parents/guardian.
9. Nurse or member of cardiac emergency response team documents the actions taken during the event on the "Cardiac Emergency Response Action Plan" form.
10. Security will announce Code AED all clear.
11. Security will check and replace AED pads, check batteries, and replace accessory kit.
12. The cardiac emergency team will debrief the event to evaluate if the team responded appropriately and if improvements could be made.

Outdoors after school dismissal:

1. For cardiac emergencies that occur outside (athletic fields) after the school day the coaching staff/athletic training staff will initiate the emergency cardiac response.
 - Coaching staff/ athletic training staff will notify security and the athletic trainer by radio of the cardiac emergency.

Cardiac Emergency Response Plan (CERP)
JS Morton Transition Center

Follow these steps in responding to a victim who suddenly collapses, appears to have no pulse, and does not appear to be breathing normally and / or to be unconscious.

1. Communication:

- Facilitate immediate access to professional medical help
 - iv. Call 9-1-1 as soon as you suspect sudden cardiac arrest.**
 - 1. Remain on the phone with 9-1-1. (Bring your mobile device to the patient's side if possible) Give the exact location and provide the recommended route for ambulance to enter and exit.
- Staff/Teacher will notify nurse on site.

2. Scene Safety:

- Move students in the immediate area away from the victim.

3. CPR:

- If staff member/teacher is CPR certified and recognizes the victim does not have a pulse and does not appear to be breathing- Begin CPR- and have someone retrieve the AED.
- Here's how:
 - Begin continuous chest compressions
 - Press hard and fast in the center of chest. Goal is 100 compressions per minute. (Faster than once per second, but slower than twice per second.)
 - Use 2 hands: The heel of one hand and the other hand on top (or one hand for children under 8 years old), pushing to a depth of 2 inches (or 1/3rd the depth of the chest for children under 8 years old).

4. If more than one staff member is on the scene:

- Direct person to retrieve the AED
- Leave the door open on the AED box, alarm will be audible and will alert the team of the location.
- Press the power on button, attach the pads to the victim, shown on the diagram on the pads.
 - Follow the AED's visual and audible prompts.
- If shock is needed, the AED will advise and deliver one or more shocks.
- Continue CPR.

- Nurse will take over medical care and CPR. Nurses will attach AED (if AED has not been attached). Paramedics will assist with CPR and initiate transportation to hospital.
- The administration prints victim's demographic information for paramedics and contacts parents/guardian.
- Nurse or member of cardiac emergency response team documents the actions taken during the event on the "Cardiac Emergency Response Action Plan" form.
- Nurse will announce Code AED all clear
- Security will check and replace AED pads, check batteries, and replace accessory kit.
- The cardiac emergency team will debrief the event to evaluate if the team responded appropriately and if improvements could be made.

Outdoors after school dismissal:

- All sporting events take place at the West campus.
