

Information from the Health Office

Medications:

Only those medications which are necessary to maintain the student in school and must be given during the school hours will be administered. To dispense any and all medications you must provide the following:

- A medication form for each medication to be administered at school. All prescription and non-prescription medications require a doctor's note.
- All medications must be in their original containers (prescription and non-prescription). The medication order form and the bottle must read identical. Please let the nurse know of any medications your child is taking at home.
- An adult must bring the medications to school (students cannot bring any medications into school).

Wellness:

Please do not send your child to school when they are sick. That means a child should stay home if they have a cold with a runny nose, are coughing or sneezing. Young children are not skilled at covering their mouths and washing their hands and can spread germs. If your child was up during the night with vomiting, diarrhea or a fever (100 & above), they should not come to school the next day. They need to be free of these symptoms for 24 hours. Furthermore, they must be fever free for 24 hours without having taken any medication. There are some illnesses that require 24 hours on an antibiotic: strep throat, pink eye, impetigo, scabies, ringworm (must be covered), pinworm (until after 1st does of medication). Please call/ParentSquare if your child is absent. If your child has one of the above illnesses, please call the nurse.

If there are any other pertinent medication condition(s) that your child has, or about which you are concerned, please contact the nurse:

Maria Herman, School Nurse
Phone: (585)495-6222 ext. 106
Fax: (585)495-6341
