# MEDICAL REQUEST FOR HOME INSTRUCTION TO BE COMPLETED BY TREATING PHYSICIAN and/or TREATING PSYCHIATRIST

#### **HOME/HOSPITAL PROCEDURES**

- To request home, hospital, or institutional instruction for a resident student, the parent or guardian must submit a request to the Pupil Personnel Office that includes written medical verification from the student's treating medical doctor demonstrating the student's anticipated inability to attend school in person for at least ten days during the next three months and written consent authorizing the Director of School Health Services or designee to contact the student's treating healthcare provider. Refusal to provide this written consent will result in a denial of the request for home, hospital, or institutional instruction.
- The request and consent will be forwarded to the Director of School Health Services who will review the need for home, hospital, or institutional instruction and will work with the school district to approve or deny the request. During this review, the Director of School Health Services may contact the student's treating medical doctor to obtain additional information necessary regarding the student's health or mental health.
- After receipt of written medical verification from the student's treating medical doctor the District will notify the parent or guardian whether their request for home, hospital, or institutional instruction has been approved or denied. In the case of a denial, reason(s) for denial will be provided.
- Parents and guardians may appeal the denial of home, hospital, or institutional instruction to the District's Board within ten school days of receipt of notification of the denial. Home, hospital, or institutional instruction will be provided while an appeal is pending before the District.
- All Home/Hospital requests will be reviewed on an individual basis. The goal is to have our students instructed in a school environment where they can be the most successful.

Effective 1/15/2024
