APPLICATIONS ARE DUE APRIL 15!

INTERN TESTIMONIALS

"As an intern, I felt like I learned how to communicate really well, to convey what I know to kids who might not understand it in the same way, which is a transferable skill to anything in life."

"The most valuable parts of the internship were gaining experience, learning about myself, and working with others."

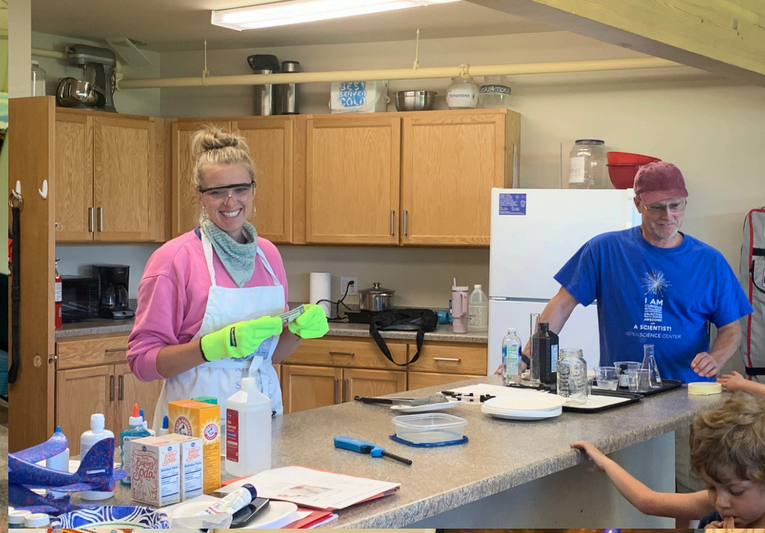

"It gave me the confidence to know that I can be a leader when pushed and I can facilitate groups in a good manner. I think these are good traits that the internship helped me work on for the beginning of this semester. It gives me the faith that it is okay not to know how to do things right away, but knowing how to listen and ask questions is highly valued in education."

"One of the things I most enjoyed about the internship was getting to teach kids and possibly having a long-term impact on them."
