School District Areas of Improvement and Planning - Monitoring

Corrective Action	Improvement and Planning Activities
Least Restrictive Environment (LRE) (SPP)	Provide professional development K-12 on continuum of services Continue professional development for Tier 1 strategies (instructional and behavioral) Continue to implement MTSS process and provide students services that meet their needs in the LRE Explore how to expand continuum of services offered at PRSD Virtual option Full-time emotional support classroom 7-12 (self-contained) Bolster mental health services within the district to support acute emotional needs Develop a checklist to review with considerations/team review/self reflection prior to OOD placement as well as decision tool to complete with IEP teams to create checks and balances Expand PBIS with advanced tiers and providing more behavioral interventions for Tier 2 and 3 Continue to expand ABA practices from K-8 to K-12 through the autism initiative Partner with the AIU to enhance emotional support programming K-12
Participation in PSSA and PASA (SPP)	Collect and review PASA data on all students that qualify to ensure they meet requirements to participate Conduct data review days in September with all case managers reviewing cases that may need reviewed to determine if the student meets ALL criteria to participate in PASA Compile data in a districtwide spreadsheet and monitor Review data with school psychologists and intervention specialists Review out of district cases and make team determinations at IEP meetings Review data with IEP teams and document appropriately Provide professional development to all special education teachers regarding PASA criteria annually Engage in the AIU's PASA training on alternative standards **Note - we are below the 1% threshold for the 24-25 school year

Identification Method

Identify the District's method for identifying students with specific learning disabilities

Discrepancy Model

Building Name	AUN	Branch Number	RTI	Approved RTI Use
---------------	-----	---------------	-----	------------------

Non-Resident Students Oversight

1. Is your district currently a host district for a 1306 facility?

No

1. Describe the host's educational oversight to ensure students with disabilities are educated in the least restrictive environment while in the 1306 facility? (If not a host, answer as if you were.)

Currently, the district does not host any 1306 facilities. For students meeting the circumstances above and eligibility under the IDEA and Chapter 14, the district will fully comply with the requirements of the IDEA and Chapter 14. This would include but not be limited to implementation of an existing IEP, child find procedures, appropriate evaluation procedures, coordination with districts of residence, and development and implementation of an individualized education plan and any required related services. The district would seek assistance from the Allegheny Intermediate Unit's intensive interagency department, if necessary, in order to ensure a smooth transition was made and a free appropriate public education (FAPE) was afforded to the child with a disability. The district would work collaboratively with any agencies involved as well. Annual public notice would be provided to the correctional facility, and, lastly, the district would develop a systematic means of communication with the correctional facility to ensure that all potentially eligible students are located. At this time, no barriers would exist within the district to provide a FAPE and meet its obligations under 1306 of the Public School Code.

2. Describe the district's procedures for communicating with 1306 facilities and how the district ensures a successful transition back to school?

Currently the district does not host any 1306 facilities. If the district discovered that a 1306 facility had opened within the district boundaries, Child Find procedures would be followed. This would include providing the 1306 facility with the district's annual child find notice along with contact information of the district's Director of Student Services and Special Education. The District's Director of Student Services and Special Education would also reach out to the 1306 facility and inquire as to the potential qualification for special education services of any of its residents. If an evaluation is required, the District would provide it at public expenses. The district would provide access to the required number of hours/days of education to allow progress toward earning a high school diploma. At the very least, access to instruction in the areas of Language Arts, Math, Science, Social Studies, and Health or Life Skills would be provided in either the District's educational programs or whichever facility would provide the appropriate educational placement. To facilitate a smooth transition back to the student's home school, if the residential facility provides notice that a student is to be released from the facility, the District will attempt to work with the student's home school district to prepare for the student's discharge from the institution

at least two weeks prior to the student's planned discharge from the residential program, if possible. If, instead of returning home, the student is moving to a residential facility in another school district, these contacts should be made with the new host school district.

Incarcerated Students Oversight

1. **Does the district have an adult correctional facility that houses juveniles within its geographical boundaries?**

No

1. **Describe the system of oversight the District would implement to ensure that all incarcerated students who may be eligible for special education are located, identified, evaluated and when deemed eligible, are offered a free appropriate public education (FAPE).**

The Pine-Richland School District recognizes that school districts, within whose boundaries a local correction institution is located, should comply fully with the requirements of the IDEA and Chapter 14 regarding the identification, evaluation, placement and provision of special education services to all eligible school-age individuals housed therein. Eligible students are entitled to receive special education both when they are charged with a criminal offense and are awaiting trial and after they have been convicted of a criminal offense. Specifically, school districts providing special education services to incarcerated school-age individuals are required to: 1. comply with the "child-find" obligations of IDEA; 2. utilize appropriate evaluation procedures and diagnostic/screening instruments to determine the eligibility and educational needs of inmates; 3. implement, timely review and/or develop Individualized Education Programs ("IEPs") for eligible students in accordance with state and federal laws and regulations, including compliance with procedural safeguards; and 4. provide FAPE in conformity with the IEP. Section 1309 of the School Code permits the district providing special education to charge the district of residence a special education charge not to exceed the total net cost of the special education program provided. Again, pursuant to Section 1306.2(c), the Department of Education will effectuate necessary procedures for the transfer of funds from the school district of residence to the school district in which the local correction institution is located which may include a deduction of the appropriate amount from the basic education funding allocation of any school district whose resident students were provided educational services in a local correction facility. In addition, the Department of Education will perform monitoring to confirm the appropriate provision of special education to children confined in local correction institutions. Districts have a responsibility to adopt and use a system to locate and identify all students within the district's jurisdiction who are thought to be eligible and to determine those students' needs through a screening and evaluation process which meets the requirements of Chapter 14. Part of this responsibility is to provide annual public notice.

Least Restrictive Environment

1. Review the district's most recent data for Least Restrictive Environment. Highlight areas of improvement.

The district continues to meet its SPP targets and percentages within Indicator 5 - Educational Environments. The most recent SEDR on educational environments is based on the December 1, 2023 child count. Within this report, state targets were not given. The percentage of district students with IEPs being served inside the regular class for 80% or more of their day was 74.84%. The overall state level was 61.92%. The percentage of district students with IEPs being served inside the regular class for less than 40% of the school was 3.01%. The state average was 10.3%. The percentage of district students being served in other facilities is 5.76% and the state average is 4.24%. While Pine-Richland's percentage of district students being served in other settings was slightly higher than the state's, the District continues to utilize supports and a continuum of services with the regular education class as the primary setting. Students' progress in other settings is continually monitored and the option of returning to the district is discussed at every IEP meeting. Gradual reintegration plans are put into place for those students' whose progress dictates a need for a less restrictive setting. We believe that utilization of these methods has caused Pine-Richland's percentage of students being served in other settings to drop by .3% over the previous 3 years. This continues to be an area of focus for the district that we are continuing to improve by offering a continuum of services. We continue to focus on expanding our continuum of services through the in-depth program review process. One area of focus is transition. Pine-Richland School District adopted the PAES lab or practical assessment exploration system is a research based assessment system that identifies aptitudes for community employment, functional skills, interests, and work behavior strengths and barriers. This system allows us to help focus upon strength areas and align transition plans to support the student as they prepare to graduate. Additionally, we have developed a team self-reflection tool to utilize when considering an out of district placement to ensure that all options have been considered in the least restrictive environment prior to the team making a recommendation for a more restrictive environment.

2. What universal practices does the district utilize to address the academic and social/emotional needs of all students in need of accommodations to their learning environments?

Following are just some of the ways that social and behavioral supports are provided to address the various needs of students: Social skills instruction; Counseling and instructional support; Psychological counseling; Best Buddies; Board Approved School Counseling lessons; Peer Buddies; Individual Behavior Support Plans; School-Wide Behavior Support Policy/ District Plan (RAMS Way); Modifications of rules and expectations as identified in the student's IEP; Cooperative learning opportunities across all school settings; Providing short breaks during instruction; Positive classroom behavior supports; Individualized behavior support plans and contracts developed between student & teacher; Clear and specific classroom expectations; Positive Reinforcement Systems; Assignment book checks between home and school; Notifying students in advance of changes in daily routine/schedules; Ongoing professional development for faculty and staff on positive behavioral supports and social skills for students with disabilities; Access and support

from PaTTAN, AIU and other agency consultants to work with individual teachers, IEP teams, or large group trainings in the area of behavior/socialization. The district continues to collaborate and consult with PaTTAN and AIU3 to work on our school-wide positive behavioral supports program across the district. Dubbed The RAMS (Respectful, Accountable, Motivated, Safe) Way, the program provides all staff members with tools to model, teach, practice and reinforce prosocial behaviors. Among these tools are acknowledgment systems and behavioral matrices that teach appropriate behaviors across all environments of each building. The matrices address expected behaviors and vary by developmental level as students mature. For students expressing more intensive social and emotional needs, or Student Assistance Program (SAP) and pupil services programs monitor and provide individualized interventions that include the above, plus tools such as school based mental health services. The district has school-based mental health services (K-12) for over seven years through the option of a third-party contract (i.e., Glade Run Lutheran Services). Additionally, the district has partnerships and collaborates with outside agencies such as the Human Services Administration Organization (HSAO), High Mark Caring Place, and Grief counseling services (Caring Place).

3. Describe the academic programming and training efforts the LEA utilizes to ensure meaningful participation of students with disabilities in the general education curriculum.

The Pine-Richland School District supports the philosophy that all students with special needs receive services within the regular education setting in their home school as the initial placement considered. The IEP team will only consider educating a student in a more restrictive environment if the IEP team decides that the child's needs cannot be met in the general education setting after documenting the exhaustion of the use of appropriate supplementary aids and services. Neighborhood school placement will be deemed inappropriate only after the IEP team considers the continuum of services from least to most restrictive, with modifications, adaptations and services provided within. When discussing the continuum of services, the team will make the determination as to where the child's needs would best and most appropriately be met with the general education environment taking precedence. Should a PRSD student be educated in a school/facility other than one of the district's schools, the student will still have access to extracurricular activities and school functions with appropriate assistance as needed. In addition, the Pine-Richland School District will also continue to contract with the Allegheny Intermediate Unit to provide services for students requiring a full continuum of special education and related services including physical therapy, occupational therapy, speech and language support, hearing support and vision support. Teachers and contracted related services support staff in the Pine-Richland School District will continue to promote the concept of Least Restrictive Environment (LRE) by applying one of three practices: in-class support, co-teaching partnerships, and teacher consultation. In-class support consists of a special education service provider (teacher, para-educator, speech and language pathologist, etc.) pushing into the class and providing special education services to the students within the class. Collaboration between all parties vested in the educational interest of a child is crucial for the advancement and success of that child. Following are just some of the ways the members of the Pine-Richland community collaborate: Opening day in-service time devoted to sharing of IEP

information (SDI, PBSP, Goals), GIEPs, and 504 plans between special and regular education teachers; parent evening workshops scheduled throughout the year; Special Education Website; Transition Page of Special Education Website; Special Education related podcasts available through the district website; Assignment book checks between home and school; Co-teaching in every building; Scheduled time for co-planning and team meetings; Professional development related to collaboration (co-teaching, differentiated instruction, adaptations and modifications); Regular meetings of IEP team members as deemed appropriate by each IEP; Training for staff and parents on how to effectively use assistive technology-AIU support; Monthly meetings with all district administrative staff; Monthly meetings with administrators of secondary education; Monthly meetings with administrators of elementary education; Meetings with special education staff; director of student services and special education attendance at monthly AIU Liaison/transition meetings; Regular communication with members of the AIU (TAC staff, AT staff, related services supervisors and staff, etc.); School psychologists and director of student services, assistant director of student services and special education and special education collaborating with both regular and special education staff in meeting the needs of all students; Grade-level and building-level meetings; multi-tiered system of support meetings at every building; On site training/support from PaTTAN, AIU and other agency consultants; Training for para-educators in order to meet the ten competencies to become highly qualified. Pine-Richland goes to many extremes to ensure that the development and delivery of instruction addresses diverse learning needs. Following are just some of the ways that the development and delivery of instruction address the various needs of all learners: Researched-based curricula and interventions; Co-teaching; Differentiated instruction based on student needs; Teaching to learning style; Modifying materials and tests; Modifying and adapting curriculum; Providing individualized instruction; Providing multiple modes of instruction; Varying content of lesson; Providing alternative assignments; Visuals and verbal cues and prompts; Study guides; Assistive technology devices as deemed appropriate in the IEP; Individual and classroom sound amplification systems; Software to enhance learning; Use of calculator and computer; Use of tape recorder; Extra set of books for home use; Notetaker or teacher outlines; Modification of work or length of assignments; Adaptations on tests and lengthy homework or projects; Additional time to complete tests or projects; Tests given orally; Google Read and Write; Word banks provided on tests; Identifying or eliminating specific types of tests (multiple choice, true/false, short answer, essay); Hands-on activities; Highlighted materials; Printed directions with picture cues; Visual schedules for visual learners; Use of manipulatives; No penalty for spelling or handwriting; Tests taken in resource room; Small group instruction; Cooperative learning groups; Paired instruction; Extended time on assignments and tests; Intense, ongoing professional development for all faculty K-12 in the areas of co-teaching and differentiated instruction; Request the services from experts at PaTTAN, AIU and other agencies to support regular and special education teachers providing instruction to students with disabilities. Every year Pine-Richland School District reviews and makes necessary adaptations and modifications to the physical environment for students with disabilities. The following are just some of the ways that physical adaptations and modifications address the various needs of students: All buildings are equipped with a sensory rooms (lighting, bean bags, swings, fidget toys, crash mat, weighted blankets and animals, yoga balls and mats,

therabands, rocker boards, trampolines, etc.); Sensory Interactive Hallways in K-6; Specialized lighting in specific classrooms and sensory rooms; Calm Down Spaces; Flexible Seating; Furniture arrangements to enhance instruction and learning; Various structural aids (grab bars, wheelchair accessibility, etc.); Specialized chairs, rockers and tables; Preferential seating; Individual and classroom sound amplification systems; Cushion seats; Wheelchair accessibility; Adaptive equipment; Flexible Seating; Small group instruction work tables; Interactive Display Board accessibility; Specialized slides on chairs to reduce noise. Co-teaching at Pine-Richland consists of both a regular education teacher and a special education teacher in the classroom providing services to all students. Co-teaching is provided through a variety of different models including team teaching, station teaching, parallel teaching, alternative teaching and one-teach-one assist. The Pine-Richland School District collaborates with the Allegheny Intermediate Unit to provide training, observations and feedback to our teachers who are implementing the co-teaching model. This model has been extremely effective and the partnership between the District and the AIU will continue throughout the years with the belief that more students will have access to co-teaching classrooms. Teacher consultation is also utilized on a daily basis. Preferably, consultation between teachers occurs during common planning time when special education teachers can consult with regular education teachers who work with particular students. However, if common planning time is not available, teachers will meet before school, after school or during the school day to consult and collaborate. Forms to facilitate electronic consultation may also be utilized. Related service providers also collaborate with general education teachers to ensure that students have access to FAPE and are provided strategies to meet student needs related to their particular areas (ex: occupational therapy, vision, etc). Within the Pine-Richland Schools, there exist a number of student interest groups such as Best Buddies, Peer Buddies, and Unified Bocce. These groups allow for integration of students with special needs into mainstream academic classes, electives/specials, lunches, extra-curricular activities, and sporting events. Often, Pine-Richland has more neuro-typical students wanting to spend time with our special needs population than students needing these natural resources. However, our District has found that no matter who participates in these groups and no matter what capacity they participate in, they all benefit. Additionally, the special education staff at Pine-Richland is continually trained and updated regarding Chapter 14 and IDEA regulations, LRE and how to calculate LRE percentages accordingly.

4. Describe the supplementary aids and services the LEA utilizes to ensure meaningful participation of students with disabilities in extracurricular activities.

For all students with IEPs, participation in extracurricular activities is not just considered but encouraged. Examples of extracurricular activities that students with disabilities have access to include but are not limited to: Prom, Homecoming, athletic events, athletic participation, band, school plays, clubs, peer-to-peer and best buddies programs, etc. Many students with IEPs can participate in extracurricular activities without supplementary aids and services. However, for those that do, the IEP team discusses what supports and services are needed and the district will then provide what is appropriate. Some examples of supplementary aids and services that

are provided to enhance participation in extracurricular activities include but are not limited to: peer supports, consultation with coaches/sponsors, special transportation, and the use of paraprofessional support.

5. **Describe the District procedures, which ensure that, to the maximum extent appropriate, children with disabilities placed in private institutions are educated with non-disabled children and have the opportunity to participate in district lead extracurricular activities?**

When a Pine-Richland IEP team places students in approved private schools or licensed private facilities, the district sends an LEA representative to each IEP meeting. The LEA representative ensures that there is a discussion regarding student progress and potential readiness for a return to the district. If significant progress is shown, plans for a gradual, tapered return to the district are developed. Often, these plans include participation at the district starting with one period per day with a gradual increase as the student's level of comfort/success increases. Social and emotional monitoring takes place to assist the student in coping with the new environment. Special transportation arrangements are also made to accommodate for the changing daily schedule. IEP meetings occur frequently to meet as the student transitions back to the district to ensure the plan is successful or additional adjustments are made to support the student. Because there are no non-disabled children in the majority of these facilities, participation in district lead extracurricular activities is always discussed when appropriate. To allow participation in district lead extracurricular activities, special transportation and other appropriate supports, accommodations and services are provided.

6. **Discuss the district's need to build capacity and expand programs and services in an effort to provide a continuum of services. (Consider the out of district placement chart)**

The district completed an In-Depth Program Review of its Multi-Tiered System of Supports (MTSS) and special education programs. As part of this review, the district examined its capacity of services in all areas, and, specifically, its emotional, autistic, and life skills supports. Emerging recommendations included the addition of a K-3 emotional support hub and a K-3 life skills support hub. The additions of these programs may enable the district to expand its continuum of services and thus educate more students within district buildings. For the past 11 years, the district has utilized a K-3 autistic support hub which has done just that. At all other grade levels, intensive AS, ES, and LSS supports are available in each of the district's buildings. With the implementation of the hub model, we have reduced our out of district placements specifically at the K-6 level. When looking at the total out of district placements in the district, only 33% of students in grades K-6 are placed. As we continue to expand and provide a continuum of services, we have engaged in professional development and additional action steps recommended by the in-depth program review to enhance student options. During the 24-25 school year, ABA (Applied Behavioral Analysis) has been expanded to grades K-8 with the intention of opening a classroom at Pine-Richland High School starting with training staff during the 25-26 school year. Teachers receive consultation and collaboration through PaTTAN one time per month as they implement intensive teaching sessions to meet student needs. Additionally, two buildings in the district are participating in the Quality Indicators of Emotional Support Services and Programs (QIESSP) to examine

the programs offered and build action plans to enhance these programs. Action plans have been created and the teams continue to expand the programs and services offered within these classrooms to meet student needs. Over the past three years, the district has made significant strides in strengthening the Multi-Tiered System of Supports (MTSS). Key initiatives include redesigning decision trees with academic cut points and implementing a standardized progress monitoring tool and secondary screening tool for students across Tiers 1-3 in grades K-12, alongside the universal screening used in grades K-6. Tier 1 instruction has also been enhanced, particularly in reading, to align with the science of reading. New resources have been systematically introduced in grades K-2 to address the five key components of reading, ensuring students receive research-based, high-quality instruction. Additionally, data summits have been conducted to analyze student performance across all tiers, allowing for instructional adjustments that align with student strengths and needs. These efforts have expanded the capacity of teachers, programs, and support services, fostering a more effective and responsive learning environment.

Positive Behavior Support

Date of Approval

2022-05-16

Uploaded Files

Policy 113.2 Update.pdf

1. **How does the district support the emotional, social needs of students with disabilities?**

Following are just some of the ways that social and behavioral supports are provided to address the various needs of students: Social skills instruction; Counseling and instructional support; Psychological counseling; Best Buddies; Peer Buddies; Bucket Filling; Individual Behavior Support Plans; School-Wide Behavior Support Policy; Modifications of rules and expectations as identified in the student's IEP; Cooperative learning opportunities across all school settings; Providing short breaks during instruction; Positive classroom behavior supports; Individualized behavior contracts developed between student & teacher; Clear and specific classroom expectations; Positive Reinforcement Systems; Assignment book checks between home and school; Notifying students in advance of changes in daily routine/schedules; Ongoing professional development for faculty and staff on positive behavioral supports and social skills for students with disabilities; Access and support from PaTTAN, AIU and other agency consultants to work with individual teachers, IEP teams, or large group trainings in the area of behavior/socialization. Additionally, students participating in the Peer Buddies programs are provided training on disability awareness and appropriate interactions and supports with/for the students they are paired with. During the 2024-2025 school year, Pine-Richland School District collaborated with the Allegheny Intermediate Unit to enhance emotional support services across the district. Throughout the year, teams of teachers, administrators, and school psychologists worked closely with the AIU to develop action plans aimed at strengthening emotional support classrooms. Using the Quality Indicators of Emotional Support Services and Programs as a framework, these teams identified strategies to improve services for students. Additional emotional support classrooms will engage in this process in future years, ensuring continued support for the emotional and social needs of students with disabilities.

2. **Describe training provided to staff in the use of positive behavior supports, de-escalation techniques and responses to behavior that may require immediate intervention.**

Prior to being hired by the Pine-Richland School District, all employees are required to read school board policy, become familiar with school board policy and sign a paper acknowledging that the employee has agreed to comply with all school board policies. Therefore,

LEA personnel are knowledgeable regarding this policy and take responsibility for making certain all interventions utilized are in accordance with the District policy. In addition, because most of the interventions implemented with students are Level I, which are preventive in nature and involve good classroom management techniques, LEA personnel are continuously evaluated and given feedback on the utilization of such strategies. Additionally, continuous professional development focused on positive intervention and effective teaching strategies, both within the Pine-Richland School District and outside of the district, are available to all staff. Specific training related to Level II and Level III strategies are conducted more on an as needed basis and are specific to the student and staff involved in implementing the procedures. LEA personnel have also received training in Functional Behavior Analysis, Applied Behavioral Analysis and Positive Behavioral Support Plans. Each building has a crisis response team that is trained annually in Comprehensive Crisis Intervention (CCM/ UPMC). Finally, any staff who has contact with a child that exhibits behaviors that impede his/her learning or the learning of others and has a positive behavioral support plan, is trained on the specifics of the plan and the strategies needed for successful implementation. These behavior management plans are part of the IEP process, developed by the team (including parents) and monitored closely by the special education personnel.

3. Describe the district positive school wide support programs.

During the 2018-2019 school year, the district began developing a School-Wide Positive Behavioral Interventions and Supports (SWPBIS) framework in collaboration with a consultant from AIU3, following state implementation guidelines. In 2019-2020, the district officially launched SWPBIS across all schools under the name The RAMS Way, which stands for Respectful, Accountable, Motivated, and Safe. This initiative provides students with behavioral acknowledgment systems designed to model, teach, and reinforce expected behaviors in all educational settings. The Pine-Richland School District has been recognized by the state SWPBIS department for its strong implementation fidelity and as a model district for successfully rolling out SWPBIS district-wide. During the 2023-2024 school year, all schools achieved Tier 1 fidelity status, and Tier 2 RAMS Way teams were developed and trained. Beginning in the 2024-2025 school year, Tier 2 supports are being implemented in all six buildings, expanding the availability of advanced behavioral interventions and services to benefit all students.

4. Describe the district school-based behavior health services.

School-Based Behavioral Health Services is addressed via a tiered system. Students that are identified as at risk for behavioral health needs are first referred to the Multi-Tiered System of Supports (MTSS) Team. Tier I strategies are applied and progress is monitored. If the student is not progressing as expected, a referral to the Student Assistance Program (SAP) may be made. Agency involvement then begins with parent permission. If behavioral health needs persist, a referral to our Pupil Services team may be made. Pupil Services provides more intense monitoring and regular discussion among building and central administration. At this level, students may also be connected with the school-based mental health provider, and a continuum of services is offered based on individual needs. This is a confidential service that is provided within each of our buildings as needed and with parent permission.

5. Describe the district restraint procedure.

Restraints to control acute or episodic aggressive behavior may be used only when the student is acting in a manner that presents an Imminent danger (clear and present danger) to self, other students or staff, and only when less restrictive measures and techniques have proven to be or are less effective. The Director of Student Services or designee shall notify the parent/guardian as soon as practicable of the use of restraints to control the aggressive behavior of the student and shall convene a meeting of the IEP team within ten (10) school days of the use of restraints, unless the parent/guardian, after written notice, agrees in writing to waive the meeting. At this meeting, the IEP team shall consider whether the student needs a functional behavioral assessment, re-evaluation, a new or revised positive Behavior Support Plan, or a change of placement to address the inappropriate behavior. If a student is in an out-of-district placement, and is restrained, Pine-Richland has notified the alternative placements that the district should be notified within 24 hours of the restraint. The alternative placement along with the Director of Student Services or designee shall notify the parent/guardian as soon as possible of the use of restraints to control the aggressive behavior of the student and shall convene a meeting of the IEP team within ten (10) school days of the use of restraints, unless the parent/guardian, after written notice, agrees in writing to waive the meeting. At this meeting, the IEP team shall consider whether the student needs a functional behavioral assessment, re-evaluation, a new or revised Positive Behavior Support Plan, or a change of placement to address the inappropriate behavior. All restraints are logged within the Restraint Information System Collection (RISC) as soon as all documentation has been provided within the quarterly windows required by the state. The use of restraints shall not be included in the IEP for the convenience of staff, as a substitute for an educational program, or employed as punishment. Restraints may be included in an IEP only if: - The restraint is used with specific component elements of a Positive Behavior Support Plan. - The restraint is used in conjunction with teaching socially appropriate alternative skills or behaviors. - Staff are authorized to use the restraint and have received appropriate training. - Behavior Support Plan includes efforts to eliminate the use of restraints

Intensive Interagency

Please address any areas of concern with students who are placed on Instruction Conducted in the Home or who are at a substantial risk of waiting more than 30 days for an appropriate educational placement.

The Pine-Richland School District ensures that students with disabilities receive a free appropriate public education (FAPE) regardless of the nature or severity of the person's disability. Through the development of the IEP, the IEP team's initial consideration is to meet the needs of the student with disabilities as adequately as the needs of a nondisabled student to the maximum extent appropriate. The IEP team will only consider educating a student in a more restrictive environment if the team decides that the child's needs cannot be met in the general education setting with accommodations, modifications and assistance. If the team determines this placement not to be appropriate, the team looks at the continuum of services from least to most restrictive and determines where the child's needs would best and most appropriately be met. At this time, the Pine-Richland School District does not have any students for whom it is having difficulty locating a program to ensure the provision of FAPE. Over the past three years, one student was referred through the interagency process to support placement. The district does currently educate 1 student in the home due to severe medical related needs. All IEP teams have been able to successfully locate or design a special educational program to ensure the provision of FAPE for each and every identified special education student. In addition to the IEP teams being able to design special education programs to ensure the provision of FAPE for all identified students, the District also resolves placement issues by collaborating with the AIU, other schools, the community and agency partners. The District staff works with a multitude of these agencies and has developed interagency collaboration for many students both within the LEA and for resident students receiving services and programs in out-of-district placements. The Pine-Richland School District did utilize Regional Interagency Coordination to assist in interagency planning to mitigate and/or eliminate barriers to placement decisions once in the past three years. The IEP team was able to find a placement for the student. The Director of Student Services and Assistant Director of Student Services and Special Education have developed a positive working relationship with the interagency coordinators from PaTTAN and the AIU. Additionally, through the many partnerships that the LEA shares with local agencies and providers, PRSD is confident that they will continue to utilize the team approach and continue to determine appropriate placements for all Pine-Richland students with disabilities. The Director of Student Services and Assistant Director of Student Services and Special Education for the Pine-Richland School District has attended training on the intensive interagency approach. Because of the working relationships that have been developed, questions regarding the interagency approach have been and will continue to be answered through the contact persons at PaTTAN and the AIU. Should interagency trainings become available in the future, representatives from Pine-Richland will attend.

Uploaded Files

- x There are a full range of services, programs and alternative placements available to the school district for placement and implementation of the special education programs in the school district.
- x The school district has adopted a child find system to locate, identify and evaluate young children and children who are thought to be a child with a disability eligible for special education residing within the school district's jurisdiction. Child find data is collected, maintained, and used in decision-making. Child find process and procedures are evaluated for its effectiveness. The school district implements mechanisms to disseminate child find information to the public, organizations, agencies, and individuals on at least an annual basis.
- x The school district has adopted policies and procedures that assure that students with disabilities are included in general education programs and extracurricular and non-academic programs and activities to the maximum extent appropriate in accordance with an Individualized Education Program.
- x The school district will comply with the PA Department of Education, Bureau of Special Education's revision notice process.
- x The school district follows the state and federal guidelines for participation of students with disabilities in state and district-wide assessments including the determination of participation, the need for accommodations, and the methods of assessing students for whom regular assessment is not appropriate.
- x The school district affirms the Pennsylvania Department of Education that funds received through participation in the medical assistance reimbursement program, ACCESS, will be used to enhance or expand the current level of services and programs provided to students with disabilities in this local education agency.
