

Student Use of Artificial Intelligence (AI) in HCPS

What is AI?

Artificial Intelligence (AI) is like a smart helper that can create pictures, sounds, videos, and even write words or instructions. It learns from lots of information it's given. When you ask it a question or tell it to do something, it thinks about what it knows and gives an answer. Even though each answer is unique, it uses what it has learned to help decide what to say. Isn't that cool?

Why Use AI?

AI can help us learn and prepare for future jobs...

90% of companies want employees who are skilled in artificial intelligence

Be AI S.M.A.R.T.

- S** Specific: Be specific with your prompt to get the most accurate responses
- M** Mindful: Remember to use AI in a thoughtful and responsible way.
- A** Aware: Understand what artificial intelligence can and cannot do.
- R** Respectful: Always be respectful of your own and others' privacy and information when using artificial intelligence.
- T** Truthful: Be open and honest about how you use artificial intelligence.
