

JOB DESCRIPTION

Job Title	Information Technology Field Technician
Department	Technology
Reports To	Service Supervisor
Classification	Hourly Classified
Location	District Office
Salary	On Schedule
Length of Contract	12 Months

This job description in no way states or implies that these are the only duties to be performed by the employee occupying this position. Employees may be required to follow other job-related instructions and to perform other job-related duties as requested, subject to all applicable state and federal laws. Certain job functions described herein may be subject to possible modification in accordance with applicable state and federal laws.

Job Summary

The Information Technology Field Technician will assist with operations, troubleshooting, and maintenance of the technology infrastructure and systems of the Eau Claire Area School District and act as the primary ECASD Helpdesk incident resolution specialist.

Essential Job Functions

- Support the successful pursuit of the District Strategic Plan and Priorities as well as School Improvement Plans by defining, delivering, and supporting the implementation of information technologies.
- Provide coverage and support for Information Technology Department as directed by supervisor.
- Monitor District Helpdesk and provide Tier 1 level support for general incident resolution and or escalate properly along with acting as an escalation point for Tier 2 level support if the Field Technician has been assigned as a “subject matter expert” for the resource.
- Troubleshooting equipment, advising the customer on how to use the equipment, building relationships with customers
- Configure devices as directed.
- Analyze log files, investigate, and correct or record errors discovered.
- Assist with network account troubleshooting.
- Assess and perform “Bench Level” repair on audio visual and electronic components.
- Develop and maintain repair processes, focusing on developing efficiencies.
- Clearly document features, technical specifications, and infrastructure requirements for self-produced technical work and job processes.
- Ensure regularly scheduled technical maintenance tasks are accomplished on time.
- Provide service and support during field visits and tie workflow to schedules to ensure maximum efficiency.
- Manage all on-site installation, maintenance, repair, and testing tasks and ensure proper documentation of all related processes.
- Diagnose errors and technical problems and determine proper solutions to produce timely and detailed service reports.

- Collaborate with the technical team and share information across the organization to build positive relationships with clients and coworkers.
- Satisfy customer needs by making appropriate recommendations and briefings using appropriate field automation systems, procedures, and protocols.
- Establish assistance by studying system requirements, including ordering and gathering essential components and parts, completing the installation, and performing quality assurance tests.
- Maintain customer satisfaction by using creativity and ingenuity to investigate complaints, identify resolutions, suggest enhanced operating techniques, and recommend system improvements.
- Service existing accounts by analyzing work orders, planning a daily travel schedule, reviewing concerns, conducting tests, and resolving problems.

Ancillary Job Functions

- Demonstrate the ECASD values of commitment, collaboration, trust, respect, excellence, and accountability.
- Utilize personal communication as a primary means to bring people together and build trust.
- Keep stakeholders informed and gather critical feedback to improve processes and relationships.
- Leverage individual abilities to compliment colleagues' needs, recognize self-weaknesses, and willingly pursue growth opportunities and trainings that will strengthen our team and support the District's mission.
- Maintain knowledge by attending educational workshops, reviewing professional publications, establishing personal networks, benchmarking state-of-the-art practices, and participating in industry related user groups.
- As part of a Knowledge Base Team, authors, reviews, improves, and provides initial approval of documentation related to troubleshooting protocols, issue resolution, training guides, maintenance schedules, configurations, and processes submitted by colleagues.
- Contributes to team effort by accomplishing related tasks and projects as needed or assigned.

Required Qualifications – Required qualifications to effectively perform the job at the time of hire. An equivalent combination of education, training, and experience will be considered. Additional requirements and/or substitutions may be requested and require the approval of HR.

- Associate Degree in a technology related field or equivalent working experience.
- Minimum two years of experience working with technology systems and experience with customer service roles.
- Knowledge of standard diagnostic and troubleshooting procedures utilized to service audiovisual, computer, and other technology equipment.
- Knowledge of Microsoft Active Directory and current Microsoft Operating Systems.
- Must maintain a valid driver's license and be able to provide transportation to move throughout the District as needed.

Preferred Qualifications – Highly desired education, training, and/or experience that may be helpful in performing the job, if applicable.

- Proficiency in Technical Writing
- Attainment of the following certifications or respective current equivalents:
 - Apple Certified iOS Technician

- Casper Technician (CCT)
- CompTIA A+
