

ONLINE COLLEGE IN THE HIGH SCHOOL

MORE CHOICE, LOWER COST.

FLEXIBLE, AFFORDABLE COLLEGE CREDIT FOR YOUR STUDENTS!

- » **Courses Exclusive to High School Students:** OCHS courses are taught by college instructors exclusively to OCHS students, with no mixing of college and high school students.
- » **Affordable Tuition:** OCHS courses are approximately half the cost of traditional PSEO and are concurrent enrollment aid eligible.
- » **Flexible Options for Schools:** Courses are online and asynchronous so OCHS students can do their schoolwork at the high school, at home, or both.
- » **In the Know:** Students provide authorization for high schools to access OCHS grades and to communicate with OCHS staff and instructors.
- » **Proven Track Record:** Nearly two decades of experience providing Online College to high schools. Currently partnered with 50+ high schools across MN.
- » **Dedicated Support:** A specialized team is available with extended hours to assist high school coordinators and students every step of the way.
- » **Savings for Students:** Students may complete the Minnesota Transfer Curriculum (MnTC) or an AA degree through the OCHS program, saving them time and money on a bachelor's degree.

“

Many classes don't require a textbook and the cost of the tuition is less expensive compared to PSEO programs at other schools.

I like that the high school can help students register for their classes and don't have to worry about if the college is connecting with the student, and I appreciate the quick responses I receive from staff if issues arise.

-OCHS Coordinator
