

SCIENCE & TECHNOLOGY

Academy for Health & Medical Sciences

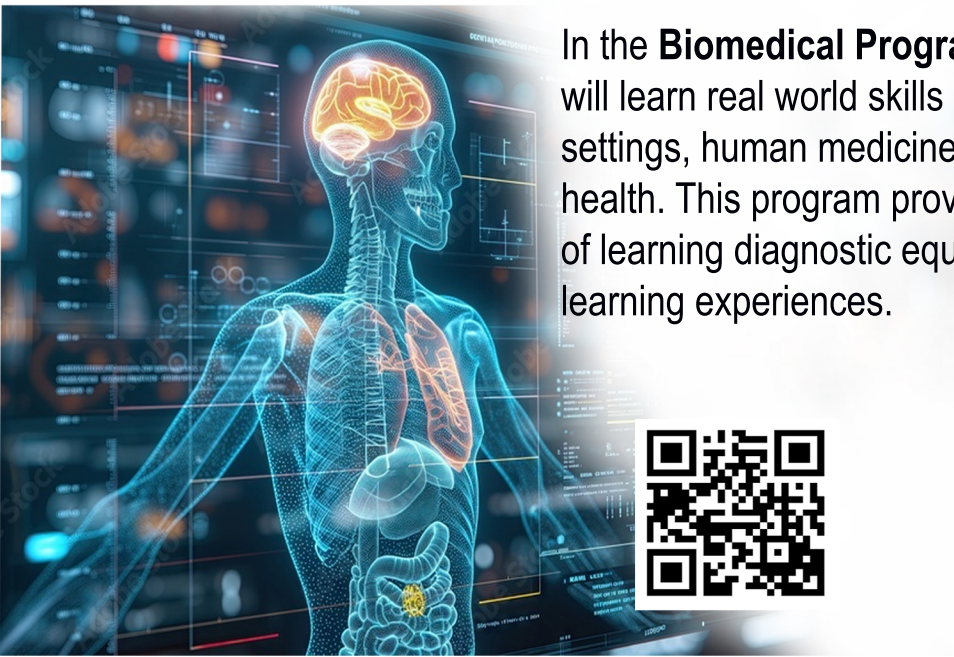

Agricultural Science - Biomedical - Computer Science
Mechatronics, Engineering & Advanced Manufacturing MEAM

The Academy for Health and Medical Sciences, in conjunction with Raritan Valley Community College, provides students with the opportunity to earn both a New Jersey high school diploma and an Associate's Degree in General Science.

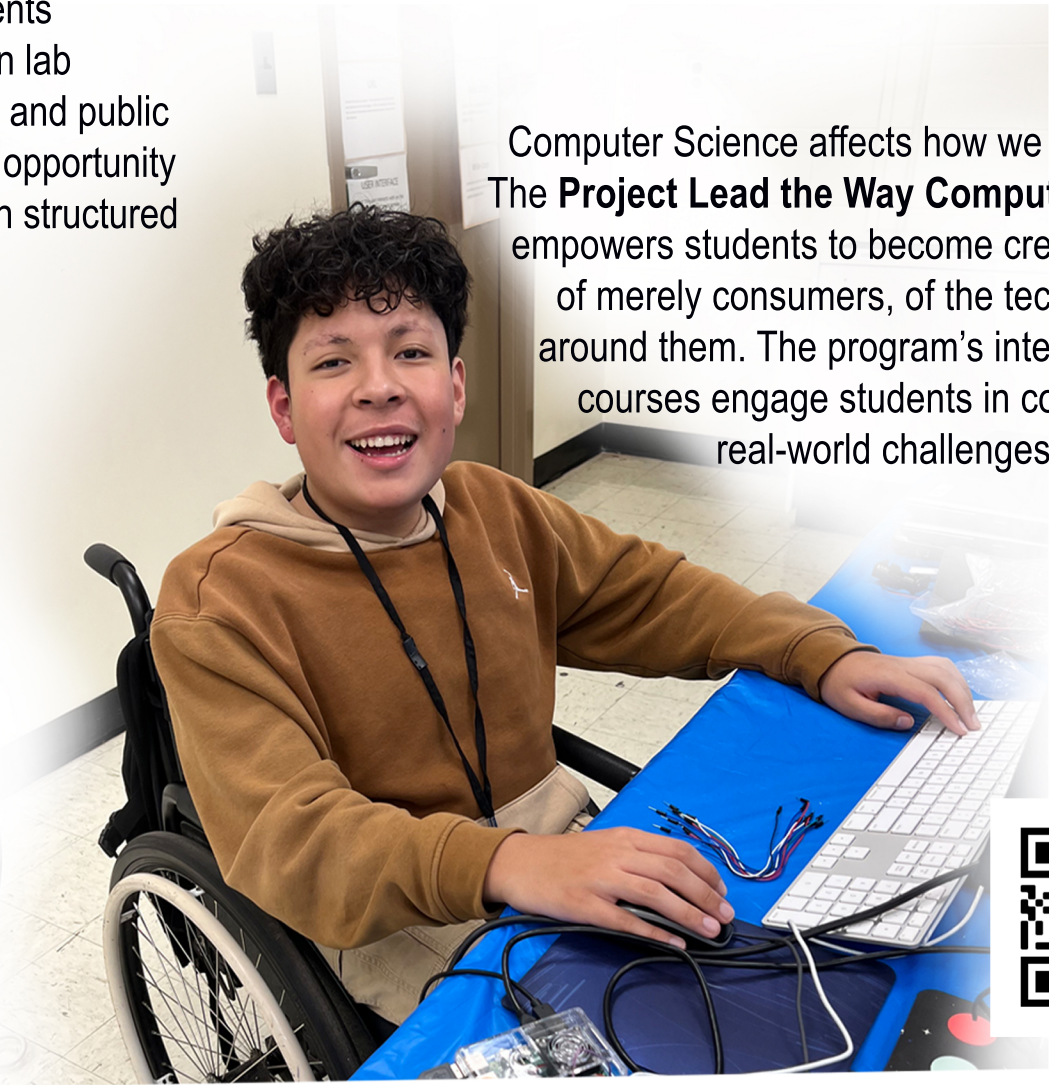

Agricultural Science students are provided with meaningful support while engaging in hands-on laboratory exercises in areas of improving our food, fiber, fuel, aesthetics and medicine.

In the **Biomedical Program** students will learn real world skills to work in lab settings, human medicine, biology and public health. This program provides the opportunity of learning diagnostic equipment in structured learning experiences.

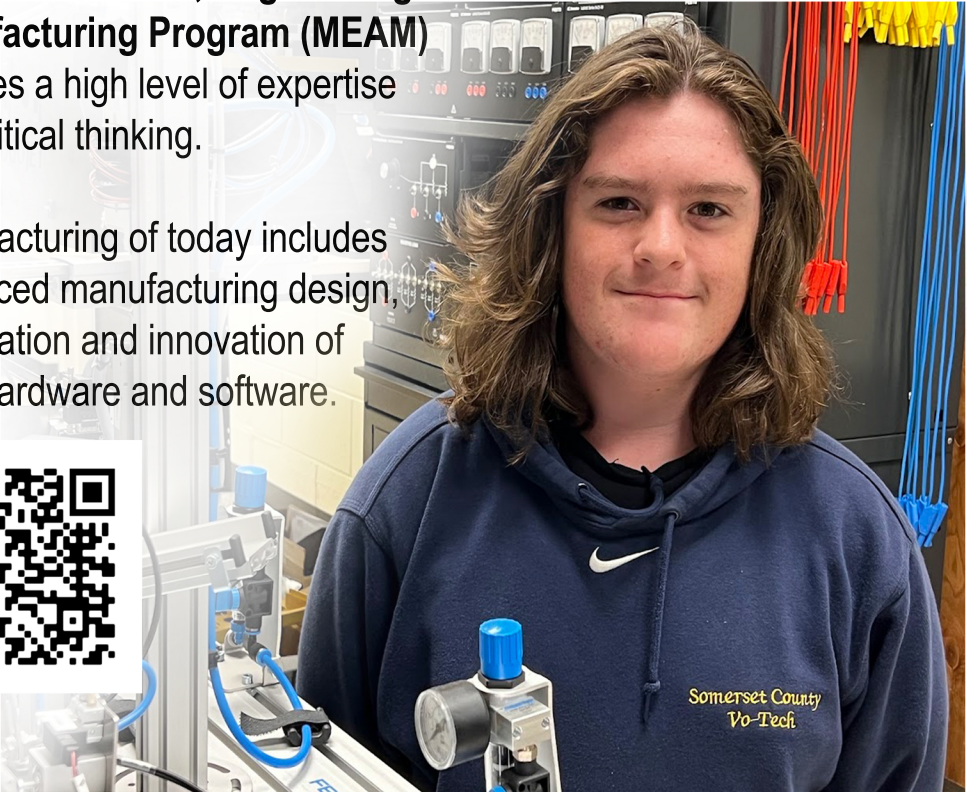

Computer Science affects how we work and live. The **Project Lead the Way Computer Curriculum** empowers students to become creators, instead of merely consumers, of the technology all around them. The program's interdisciplinary courses engage students in compelling, real-world challenges.

The **Mechatronics, Engineering & Advanced Manufacturing Program (MEAM)** requires a high level of expertise and critical thinking.

Manufacturing of today includes advanced manufacturing design, automation and innovation of both hardware and software.
