

Maypearl Independent School District

TRADITION – PRIDE - PURPOSE

March 22, 2025

Dear Maypearl Primary School Parents,

It's been a very windy Spring Break, and work has been ongoing at every building in the district. We're excited to update you on the progress we've made at the Primary Campus.

The link below will direct you to a document we will update weekly on the facilities page of the website, so you can access it anytime. It should look familiar, as it contains the timeline of items mentioned in the letter we sent out before Spring Break. We are wrapping up some work on campus today and tomorrow, and we also aim to provide information that will help clarify how carbon dioxide levels are calculated.

[MPS Updates on Facilities Page of Maypearl ISD Website](#)

The typical carbon dioxide level outside can range from 400 to 500ppm, with most recent readings being in the mid to high 400s. For example, if the outside level is 466ppm and the room reading is 1,150ppm, the difference would be 684ppm, which is still below the recommended 700 ppm. That is what we mean when we say we are monitoring the air quality. While the readings may show red or yellow, subtracting the outside air level helps ensure that we are working to achieve the optimal, recommended air quality.

Again, when we have more information to share, we will continue to update the document linked on the website.

We look forward to seeing all our students back on Monday, March 24, 2025. Enjoy the rest of your Spring Break Weekend!

Superintendent
Ritchie Bowling

Assistant Superintendent
