

## PROCEDURE FOR FEEDING SPECIAL NEEDS AND FOOD ALLERGY/DISABILITY STUDENTS

Treutlen County School Nutrition Program recognizes the needs of students with special needs and food allergies/disabilities. Substitutions will be made as long as there is a physician's order stating what must be substituted for the child.

The School Nutrition Director will review and approved the request.

The food allergy/disability specialist will review the menu daily and make modifications where necessary.

Parents will be contacted annually to determine if allergy/diability is the same.

Written documentation is required to make any changes.
